# MAIN PROBLEM

- P: So, around the age of 13-14 I had the first symptoms related in particular to the sexual sphere, in the sense that it was something for which I felt a strong repulsion, so everything is related to masturbation was for me something, let's say, taboo, so it shouldn't have been taken into consideration and also the first experiences in the adolescent phase, absolutely for me should not have been taken into consideration.
- R: Explain me better...
- P: After practicing masturbation I had to wash my hands an exaggerated number of times.
- R: Was it fear of getting sick ?
- P: No, of contamination just like from dirty material

# MAIN PROBLEM

- R: The contamination was also linked to other situations ? I mean were you afraid for example drinking from someone else's glass rather than ...
- P: Absolutely not
- R: touch a handle ...?
- P: Absolutely not. It was exclusively related to that area. Touching my penis to urinate was not a contamination. The same gesture related to the sexual sphere, automatically became contamination, despite the fact that the gestures were the same. Basically the problem has not changed, but it has shifted the sphere because it no longer concerns the sexual sphere, which now does not give me any kind of problem, but instead concerns everything concerning urine and stools. These two aspects here for me have become the new taboo.

# MAIN PROBLEM

- Need for multiple washes, more intense washes, etc.
- Now my symptoms are related exclusively to... I don't know... when I go to the bathroom I have to wash my hands more times than what could be normal, and then oh well the shower, the shower has always been a particular moment for me; an incredible number of washes of the intimate parts of the body, a continuous and prolonged washing of the genital area that in some periods of my life could take me in the shower even for one hour.
- The rest of the body has not any kind of possibility of contamination.

R: And what kind of pleasure does this give you? Is it related to being the center of attention?

P: Yes, certainly, this is the first point, that is, I was struck by this figure for two reasons: the use of the voice, which has always been something I liked, for example I have always recognized immediately different voice actors of the movies. I have always listened the radio so the voice is one of the aspects... secondly yes, it certainly related to my self-centeredness, yes, certainly.

# INDIFFERENCE

- Let's talk about my character, I don't know, in the relationship with others ...
- I don't consider myself an extremely altruistic person, as we said before, being a rather reserved person, I have just little interest in listening to others' problems, I am sincere.
- I do not care about anything in the whole world... there're 10 persons I care about and I do my best for them...
- I am much more concerned about the flu of my mother rather than the youth unemployment rate...

- Related to this continuous washing he is suffering from anal fissures
- Since 4 years he is taking VENLAFAXIN
- He never tried to reduce; when he forgets to take it he has fits of anger and his quick ejaculation is worsening.
- As side effect of the drug his libido decreased and he has difficulties in falling asleep.
- These symptoms strongly ameliorated during the homeopathic treatment and they disappeared completely when he stopped to take the allopathic therapy.
