FISH IN NATURE

Roberto Petrucci - Viktória Németh

- Fish are aquatic, gill-bearing animals that lack limbs with digits.
- They can be found in nearly all aquatic environments, from high mountain streams to the deepest ocean.
- With 34,300 described species, fish exhibit greater species diversity than any other group of vertebrates.

Nervous system

They have quite small brain,
the conduction is relatively very slow,
the forebrain is weakly developed
(centre of the higher intellectual
functioning: concentration, learning)

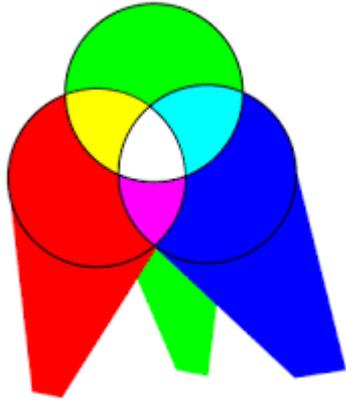

SIGHT

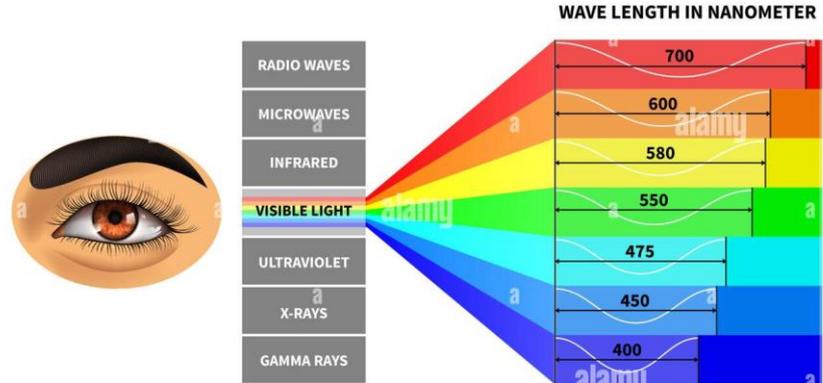

WELL DEVELOPED SENSE OF SIGHT

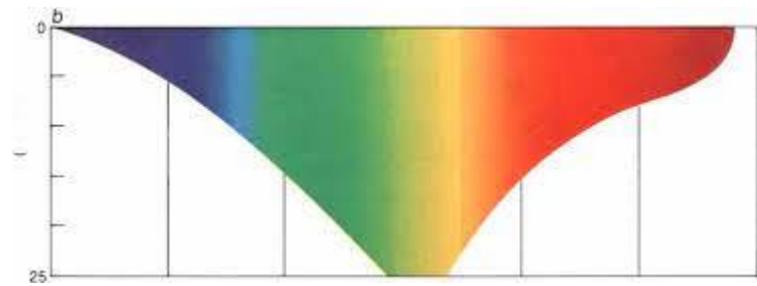

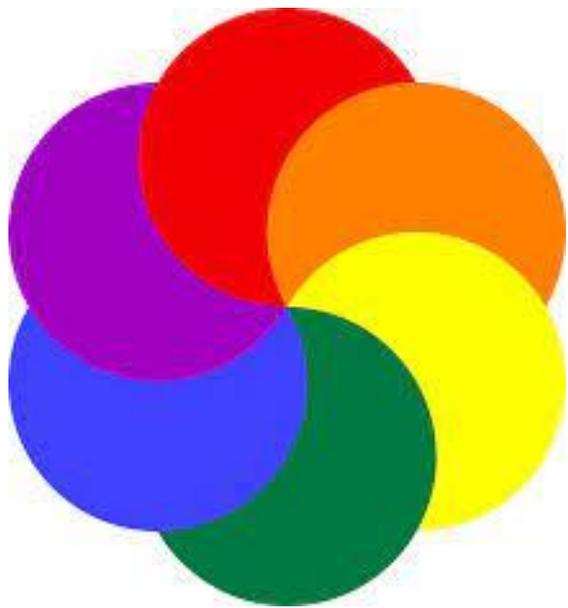

See in 7 color spectrum

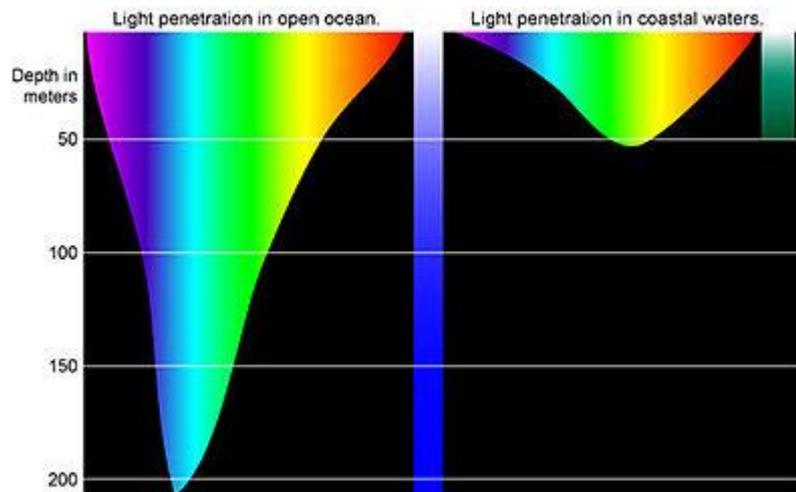

(human can see 3 color spectrum)

Additive color mixing with red, green and blue additive primary colors.

HEARING

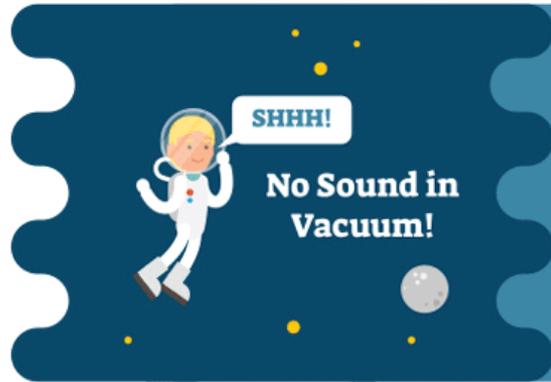

Use not just ears, use their skin, muscles and lateral line

They sense and hear at the same time (sound travels 5 times faster in water than in air)

SOUND

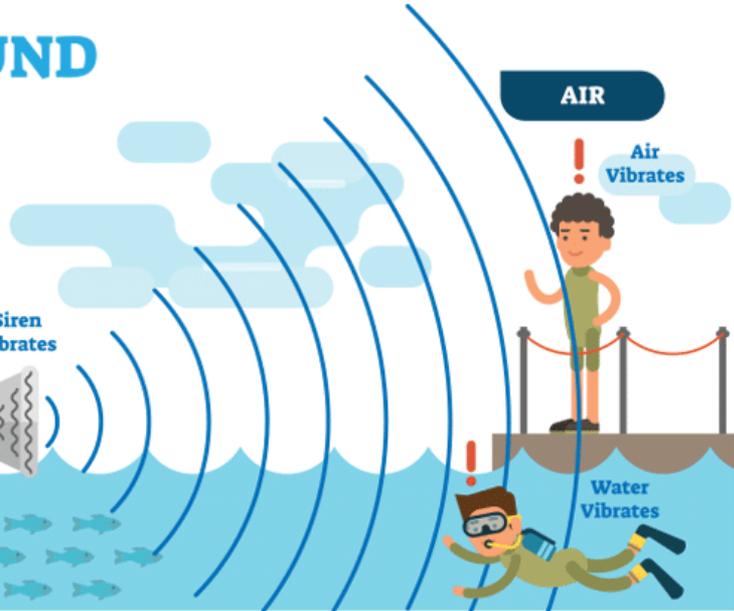

Sound Waves are Longitudinal Waves

VACUUM IN SPACE

SIREN

AIR

WATER

SMELLING

very acute (salmon remember the smell of the birthplace)

paired nostrils

have chemical sensors

CIRCULATORY SYSTEM

Single system circuit

Heart pumps blood first to the gills then flows to the rest of the body

Low blood pressure

They have extra heat from muscle work

SLEEP

Usually they are alert, but need to sleep

EMOTION

- They can show love
- Know how to express love
- Able to learn
- Live in hierarchical system

HOMEOPATHY

ESSENTIALS

FISH IN HOMEOPATHY

Roberto Petrucci - Viktória Németh

ALONE

- Prefer to stay alone
- Daydreamers
- Need for freedom and independency
- Escape into their own created world

DETACHMENT

- Do not like being in company
- Do not like being a part of a society
- Withdrawing
- Do not like physical contact
- Forgetful

PROTECTION or PRISON

- Want to escape to the Universe
- Want to feel light and lost in time and space
- Internal calmness, external quickness
- Body feels heavy and numb

ANGER

- Aggression toward to the world
- Mood changes quickly
- Sudden attack
- Feels himself as a target

INDIFFERENT

- Cannot stand contradiction
- Do not care about others opinion
- Do not care about mental activity (learning, understanding)
- Hard to follow commands

RESPONSIBILITY

- Responsibility is a heavy task
- Do not want to take care of others
- Difficulties in studying

HORMONS

- Fertility problem
- Aggravation or amelioration during menses

DISCHARGES

- Dryness
- Copious

ESSENTIALS

- Solitude and isolation in a protected world
- Detachment (autism, dementia, Alzheimer, detached sexuality)
- My body is a protection and a prison as well
- Irritability against a world full of deadly dangers
- I don't bother about your opinion because I'm perfect as I am
- Aversion responsibility
- Infertility and hormonal problems
- Copious or suppressed discharges: leukorrhea, rhinorrhea, salivation, polyuria, diarrhea, metrorrhagia

SERUM ANGUILLAE

Complete Dynamics Repertory 1321

GROUP: FISH

PART: MIGRATORY PREDATORS

HOMEOPATHY  ESSENTIALS

Roberto Petrucci - Viktória Németh

SERUM ANGUILLAE

- Nostalgic feeling with longing about birthplace, childhood, parental house or village, first love (often dreams of travelling)
- Want to move and run, but thought is paralyzed and every movement is exhausting
- Problems seem insurmountable; everything is collapsing inside me, destroying me
- Sexual thoughts (first phase) followed by repression of sexuality in order to develop spirituality (second phase)
- Kidney complaints characterized by oliguria or anuria, albuminuria, cylindruria and hypertension, more often without edema
- Heart complaints (especially valves) with sensation of collapsing and tightness, as if a hoop around the heart
- Loss of thermal sense: searching for cold to reduce the internal heat but great chilliness when tired
- Wandering joints pains

HOMEOPATHY  ESSENTIALS

Roberto Petrucci - Viktória Németh

GADUS MORRHUA

ATLANTIC COD

gad.

Synthesis Adonis 84

GROUP: FISH

PART: BOTTOM-DWELLING PREDATORS

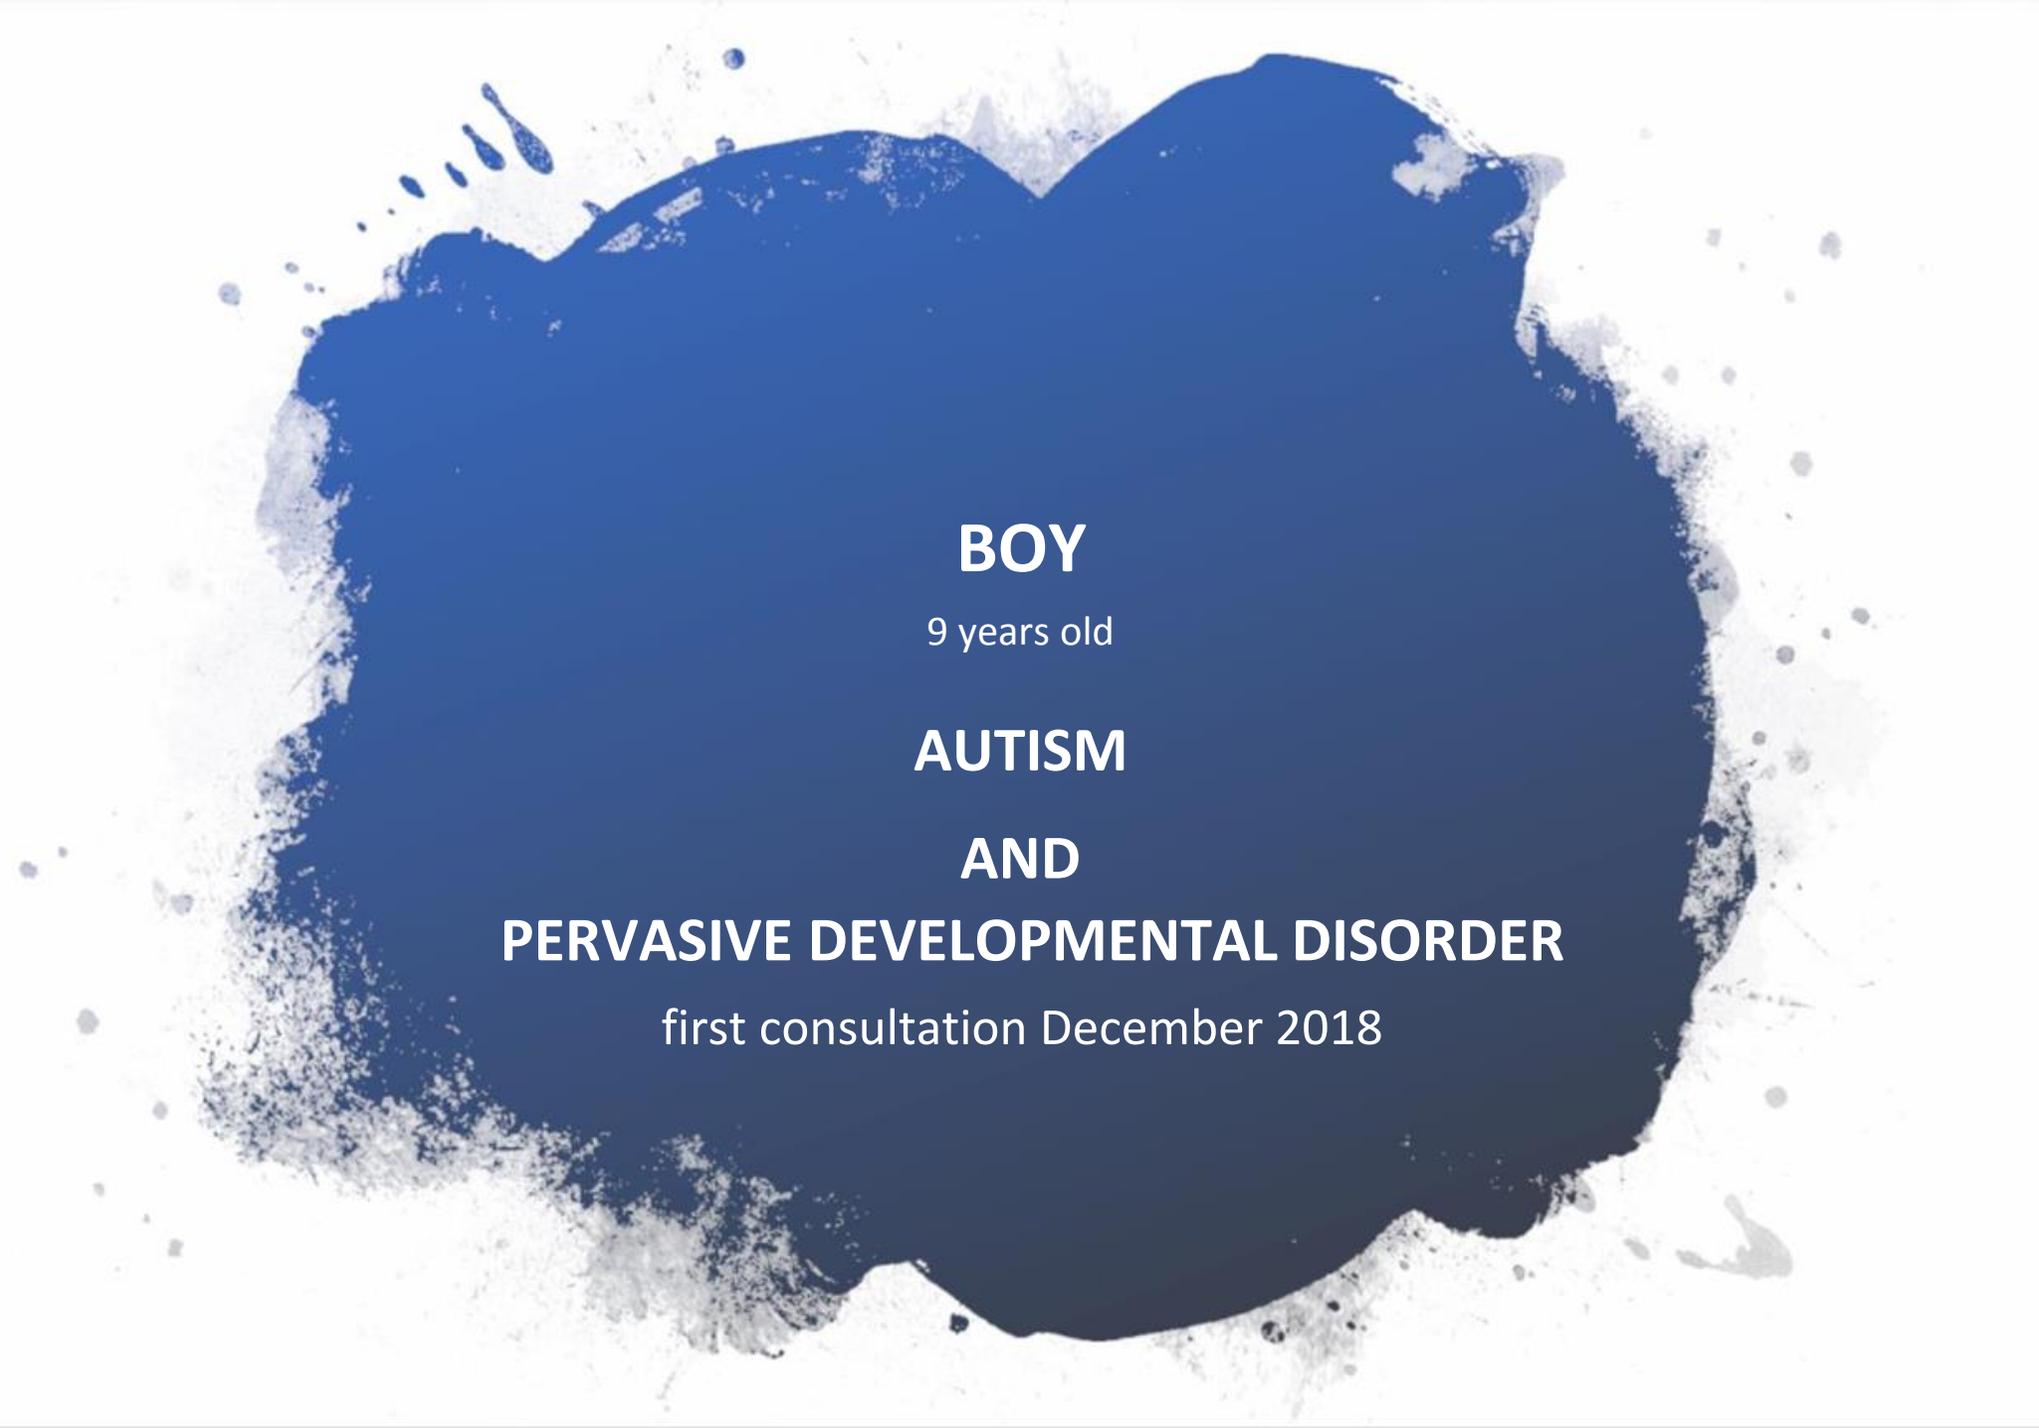

HOMEOPATHY  ESSENTIALS

Roberto Petrucci - Viktória Németh

GADUS MORRHUA

- Mental retardation, slowness, torpor, dyslexia, apathy, worn out, up to withdrawal from reality
- Despair feeling with hopelessness for the future
- Deep melancholy with thoughts and desire for death
- Indifferent to others, he is just an observer in a world full of danger
- Bones complaints (especially long bones and big joints): bruised sensation in femur from head of bone to patella; pains in the hips extending downward; in the first left rib, dorsal vertebrae, lower back and sacrum
- Asthmatic respiration: very frequent breathing, as if air passages were closed, with oscillation of wings of nose, light cough and frothy expectoration
- Sensation of swelling and fullness in the bladder with stitching pain; urination almost impossible
- Very severe coldness from hip down to feet but hands palms excessively hot and dry

BOY

9 years old

AUTISM

AND

PERVASIVE DEVELOPMENTAL DISORDER

first consultation December 2018

HE TOOK FROM ANOTHER HOMEOPATH
Stramonium, Hyosciamus, Anacardium,
Mercurius, Sulphur, Alumina without
any improvement

**PAST
HOMEOPATHIC
TREATMENTS**

Until the age of 3, he had a normal psycho-physical development
(he spoke, walked, sang, smiled)

DEVELOPMENT

HOMEOPATHY  ESSENTIALS

However, by the age of 2 he was already having tantrums much more exaggeratedly than other children, for no apparent reason.

TANTRUMS

HOMEOPATHY  ESSENTIALS

Furthermore, from the time he was an infant, he had serious sleep disorders: he slept very little during the day and woke up continuously during the night (up to 9 times)

SLEEPLESSNESS

HOMEOPATHY  **ESSENTIALS**

☹ MIND - AUTISM

☹ MIND - TEMPER TANTRUMS

☹ SLEEP - WAKING - frequent

- At the age of 3 he had a stop in progress and a regression in socialization: he became an unsmiling child, with little eye contact, who did not like the company of other children at all, daily had very strong and long nervous breakdowns during which he would scream and throw himself on the floor beating us and himself.
- We consulted more than one specialist and the diagnosis was autism and pervasive developmental disorder.

DIAGNOSIS

Since then it has been always worse: the gap between him and his peers is more and more marked and there is no improvement in his cognitive-behavioural profile although he alternates periods in which he is calmer, participative and receptive with periods in which he is more nervous and agitated

BEHAVIOUR

He is reckless, unpredictable and has no inhibitions, for example he tends to climb over railings and walls, even very high ones; if I am reproaching him, he ~~SUDDENLY~~ reacts and hits me.

BEHAVIOUR

When he is **ANGRY** he has also the tendency to throw objects; often he threw objects out of the window

ANGRINESS

HOMEOPATHY  **ESSENTIALS**

He has frequent mood swings; while he laughs for no apparent reason, he **SUDDENLY** screams and despairs for reasons that seem specious: 'I don't want to stay here', 'I want to go for a drive', 'I want to buy chicks', etc.

MOOD SWINGS

HOMEOPATHY  ESSENTIALS

He is always very impatient and he is always ready to go out, as if he feels caged at home and the busier he is the better; he is always very restless

**IMPATIENCE
AND
RESTLESSNESS**

HOMEOPATHY  **ESSENTIALS**

W MIND - THROWING things around

W MIND - THROWING things around - window; out of

W MIND - MOOD - changeable

W MIND - IMPATIENCE

W MIND - RESTLESSNESS

- He doesn't know what to do during his free time because he doesn't concentrate on anything, he doesn't play, he doesn't read, he doesn't draw, and he **WANDERS AROUND THE HOUSE CHAOTICALLY** doing damage and ~~eating all the time~~; when he is eating is feeling better.
- He has very big problems in concentration, he can concentrate just a few minutes; he does not write or read and has difficulty connecting the dots in pre-writing exercises. When he does not want to do a teaching activity he rebels even **USING FORCE OR SHOUTING**.

CONCENTRATION

HOMEOPATHY  ESSENTIALS

He benefits from a support teacher and school assistant.
He is not well tolerated because he always would like to command other children.

COMMAND

He has also problems in understanding the time; often he is telling it's morning but it's evening or the opposite.

TIME

HOMEOPATHY  **ESSENTIALS**

W MIND - EATING - when - amel.

W MIND - DICTATORIAL

W MIND - CONFUSION of mind - time; as to

- He loves water more than anything else, riding horses and animals in general
- When he's not at school, as soon as he wakes up he wants to take a bath, he loves to soak and then at some point relaxes by lying down in the tub
- He especially loves physical games such as wrestling and tickling or playing with water, possibly getting completely wet

WATER

HOMEOPATHY

ESSENTIALS

- He has been horse-riding for three years without ever having had the slightest fear. Although he loves animals very much, he is not particularly loving: he pulls the tails and ears of dogs, cats and even the horses.
- He has no fears at all, just one... he is afraid of dark.

FEARS

HOMEOPATHY  **ESSENTIALS**

☹ MIND - WATER - loves

☹ MIND - FEARLESS

☹ MIND - FEAR - dark; of

- On the physical level he has a lot of problems with skin; for 3 – 4 years he is suffering for an eczema on the margin of the hairs and very often he is scratching his legs and behind the knees but there I have never seen any eruption.
- The second physical problem is constipation; it's a chronic problem and he suffered about it since ever.

PHYSICAL COMPLAINTS

WHEAD - ERUPTIONS - eczema - Margins of hair

WEXTREMITIES - ITCHING - Knees - Bend of

WEXTREMITIES - ITCHING - Legs - eruptions;
without

WSKIN - ITCHING - eruptions - without

WRECTUM - CONSTIPATION - chronic

PART: ON THE MOVE PREDATORS

HOMEOPATHY  ESSENTIALS

Roberto Petrucci - Viktória Németh

GALEOCERDO CUVIER HEPAR

- Irritability against a world full of deadly dangers and always alert and heightened for something can happen but feeling of fearlessness
- Lots of anger with sudden reaction
- Easily lose his temper with feeling none can harm me
- Pervasive and sexual uncontrollable thoughts but their libido vanishes when their partner is nearby
- Mentally very bright and sharp but tired and weak physically
- Sensation of internal hum but also the world and the time are humming
- Restlessness, always in motion and amelioration from motion
- Musculoskeletal complaints especially in the upper part of the body (pain and stiffness in shoulders, scapulae and dorsal region) with consciousness of bones

HOMEOPATHY  ESSENTIALS

Roberto Petrucci - Viktória Németh

ON THE MOVE PREDATORS

- Lots of anger with sudden reaction
- They are very offensive and rude to the others
- Easily lose their temper and act rapidly
- No happiness in the life, there is a lot of danger around
- Fear of being injured
- Acting first to avoid the danger and to be attacked
- There is two option in the life: to stay alive or to die
- The inner world is fragile, hardly can protect it

HOMEOPATHY  ESSENTIALS

A top-down view of a desk with a cup of coffee, a notebook, paper clips, and tulips. The notebook has a red and white patterned cover with the text 'MAY SAY I'M A DREAMER'. A pink horizontal bar is positioned across the middle of the image.

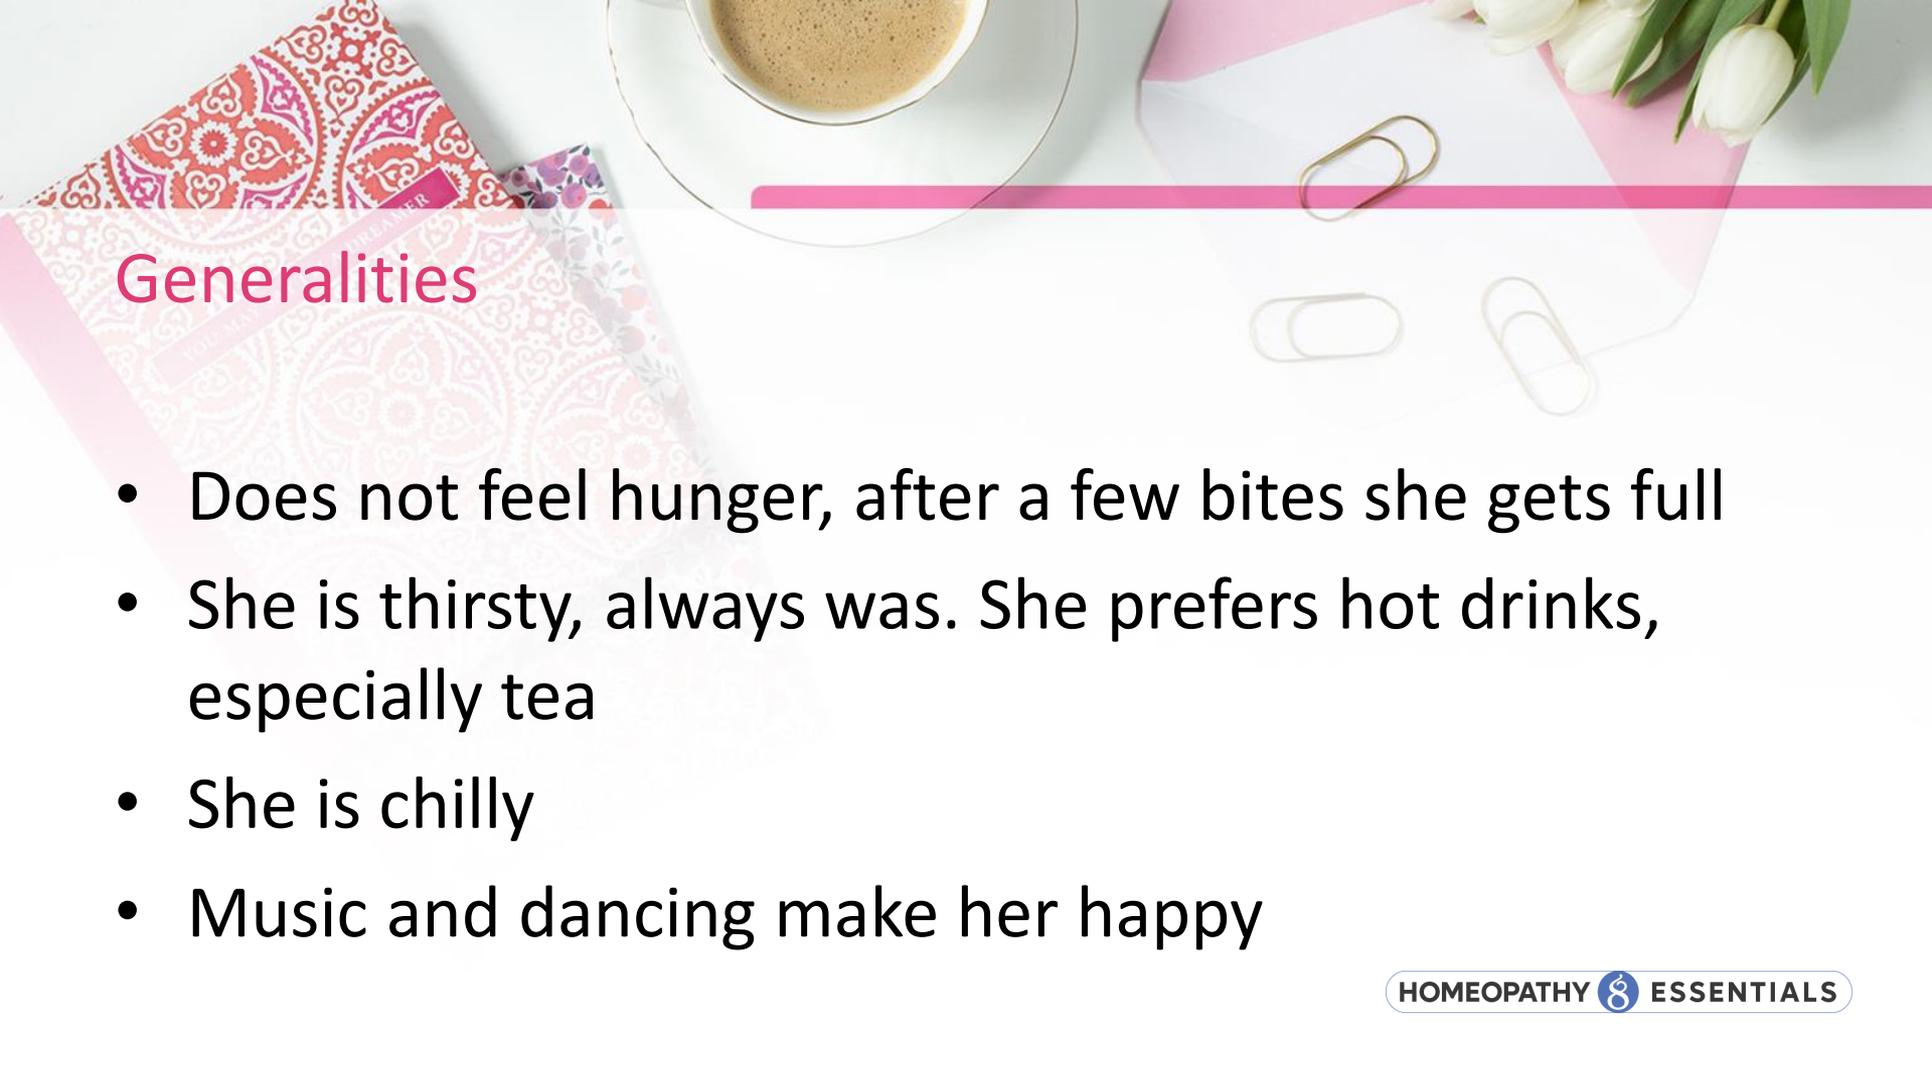

Slide Title

Main problem

Dementia

Past History

- Asthma
- Lot of respiratory problems
 - ear
 - nose
 - cough

A top-down view of a desk with a cup of coffee, paper clips, and tulips. The coffee cup is white with a saucer. There are three gold paper clips on a white sheet of paper. A pink envelope is partially visible. A bouquet of white tulips is in the top right corner. A pink horizontal bar is across the middle of the image. A notebook with a red and white patterned cover is in the top left corner.

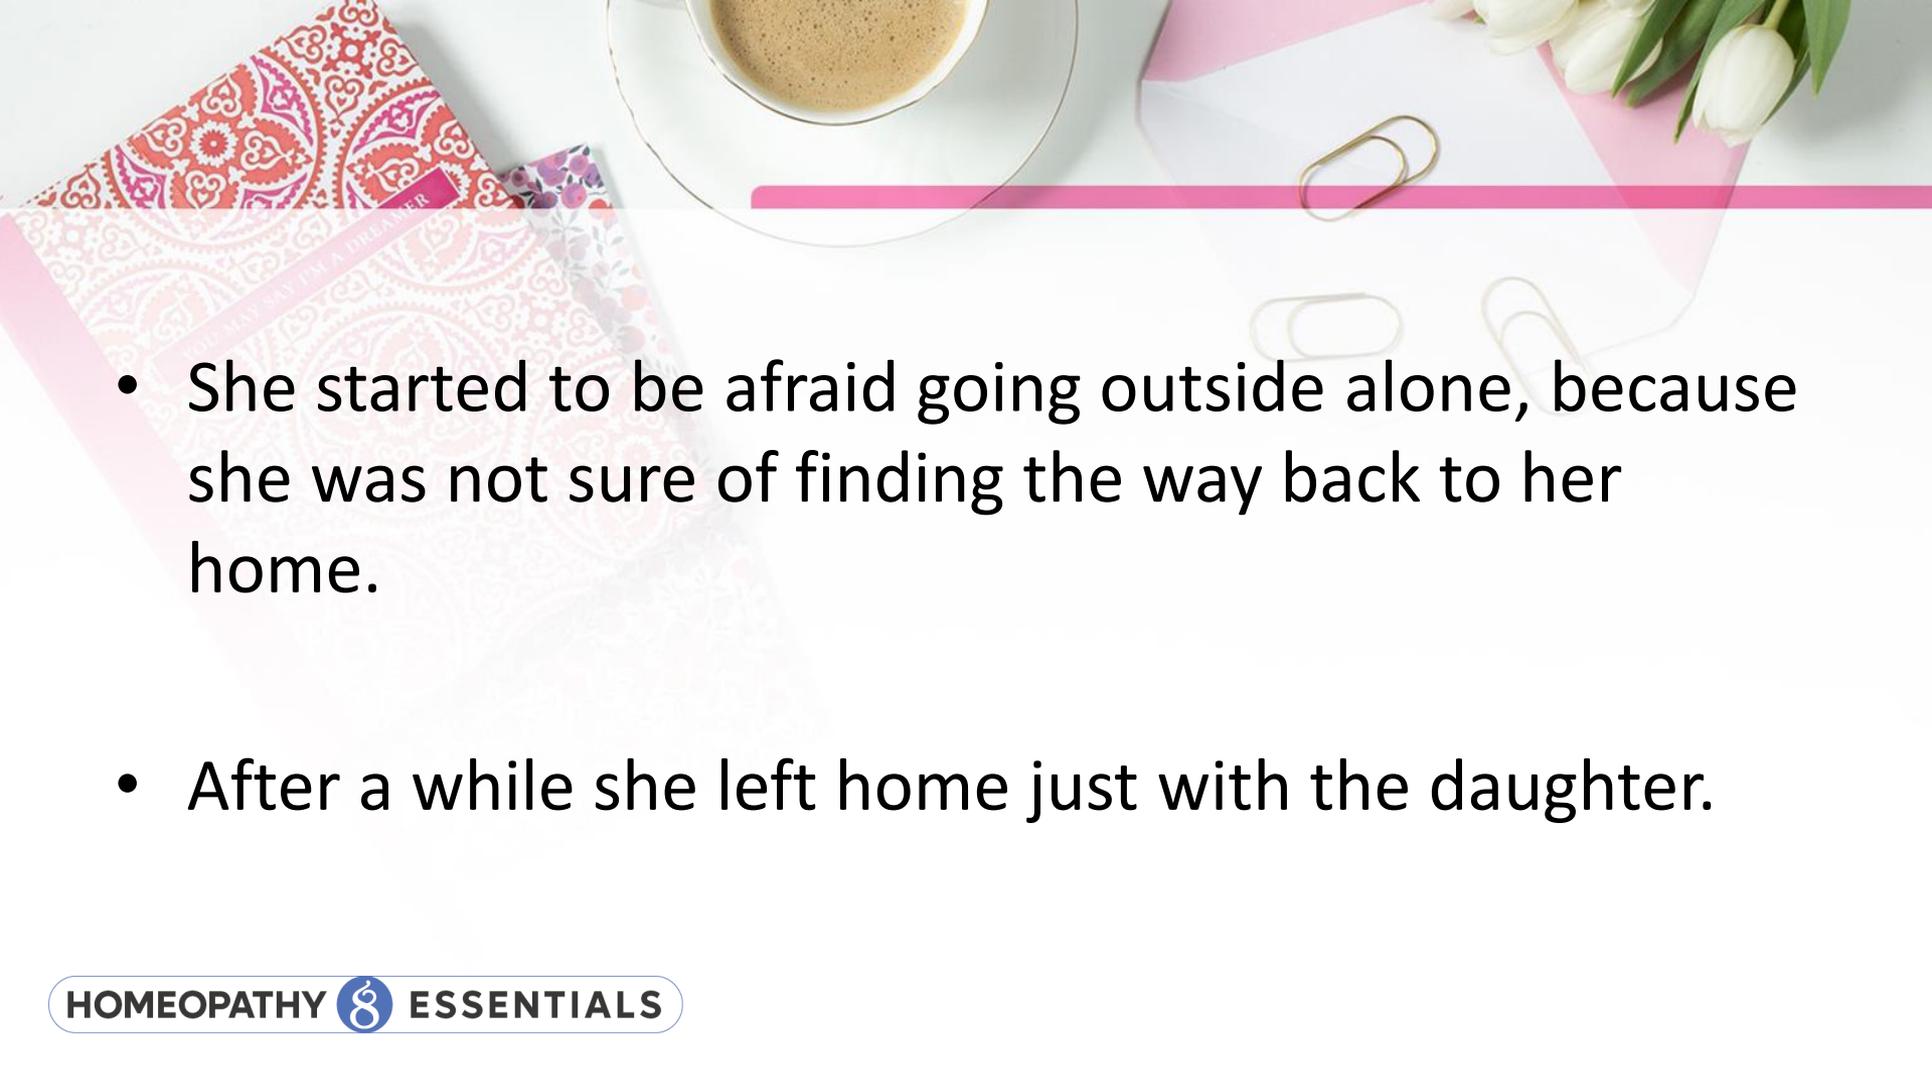

Generalities

- Does not feel hunger, after a few bites she gets full
- She is thirsty, always was. She prefers hot drinks, especially tea
- She is chilly
- Music and dancing make her happy

Dementia started

- It started around 3 years ago (as the daughter explained)
- It started with a banal situation. The mother wanted to call her daughter but she did not remember the number.
- She always had problem with memory but never with numbers. She knew all the telephone numbers by heart.

- 
- It happened again a few times more; she wanted to call the daughter but she could not recall the number from her memory.
 - After it she realized that she is not remembering others' phone number either.
 - Then it continued with her orientation

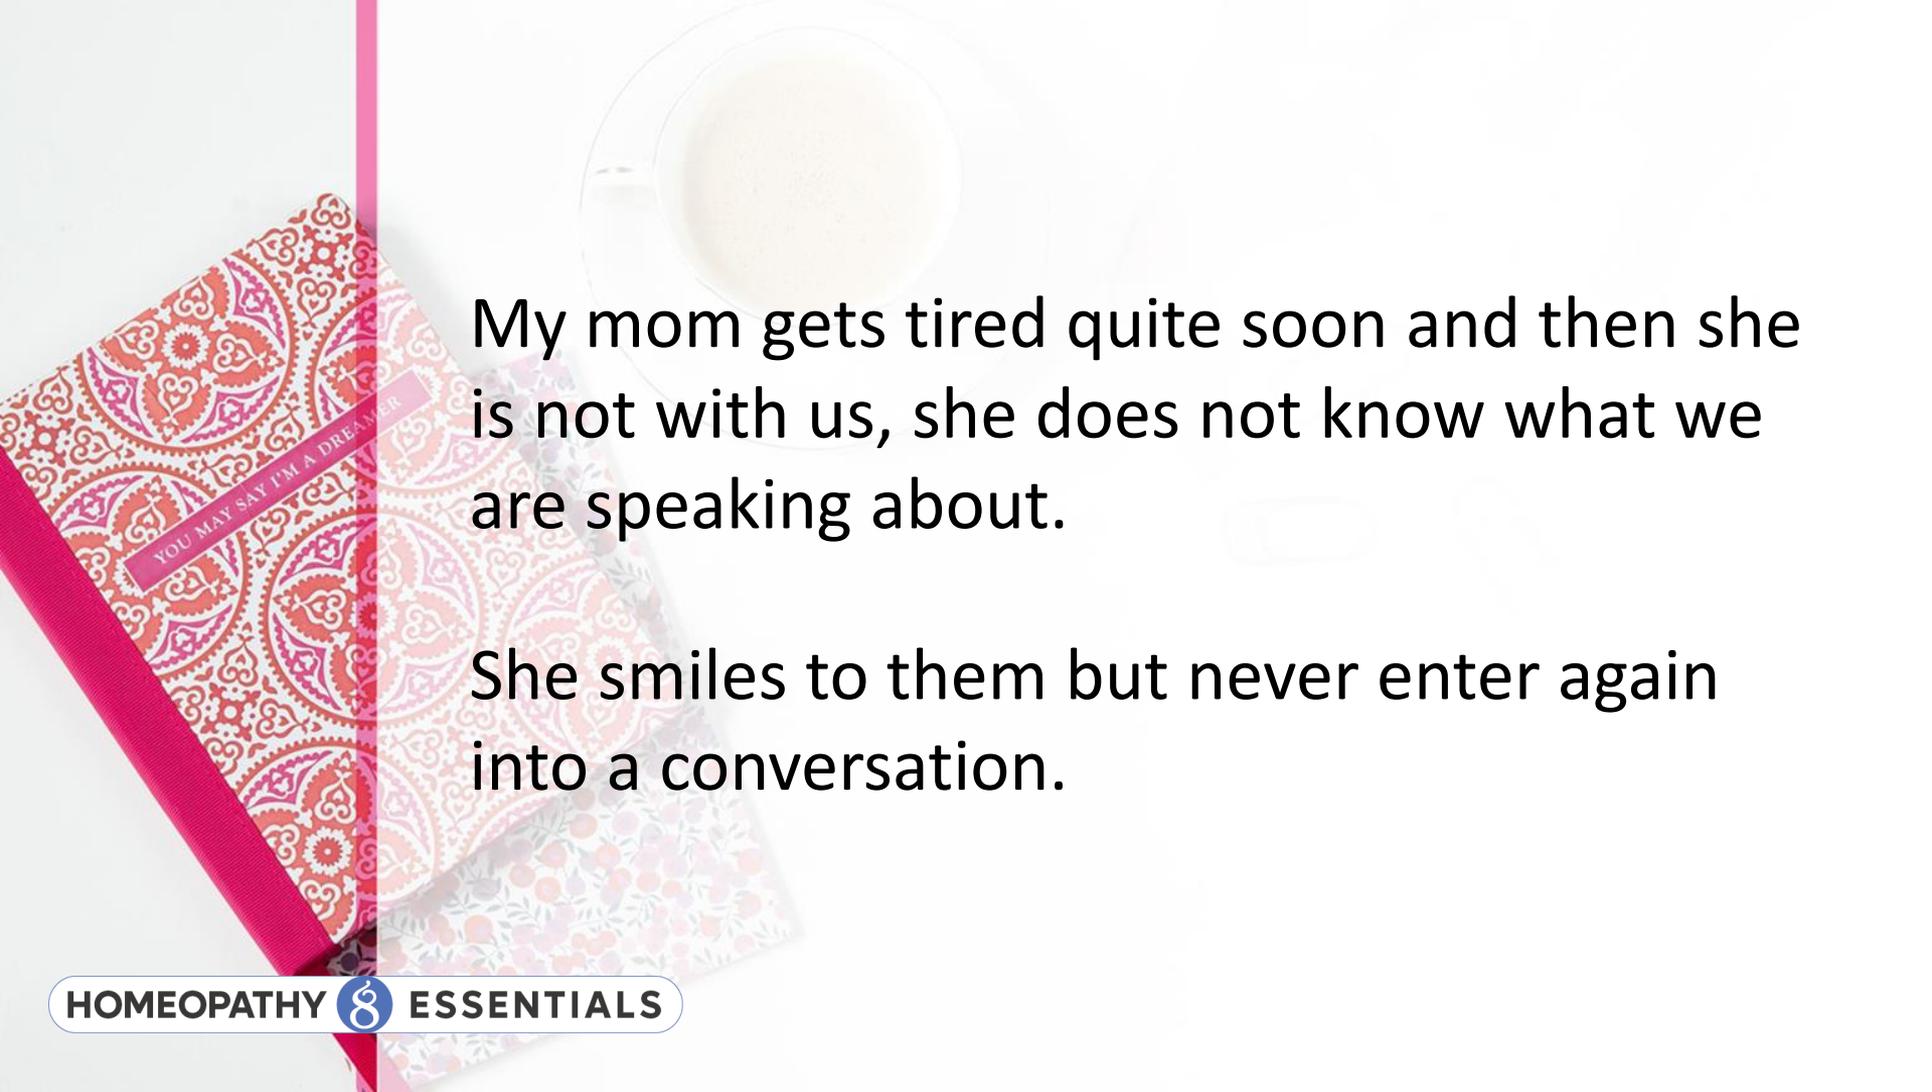

- 
- A top-down view of a desk with a cup of coffee, a notebook, paper clips, and tulips. The notebook has a red and white patterned cover with the text 'MAY SAY THE DREAMER'. A pink horizontal bar is positioned above the text.
- She started to be afraid going outside alone, because she was not sure of finding the way back to her home.
 - After a while she left home just with the daughter.

Daughter told

My mom is recognising her family, she is still remembering the names of her relatives.

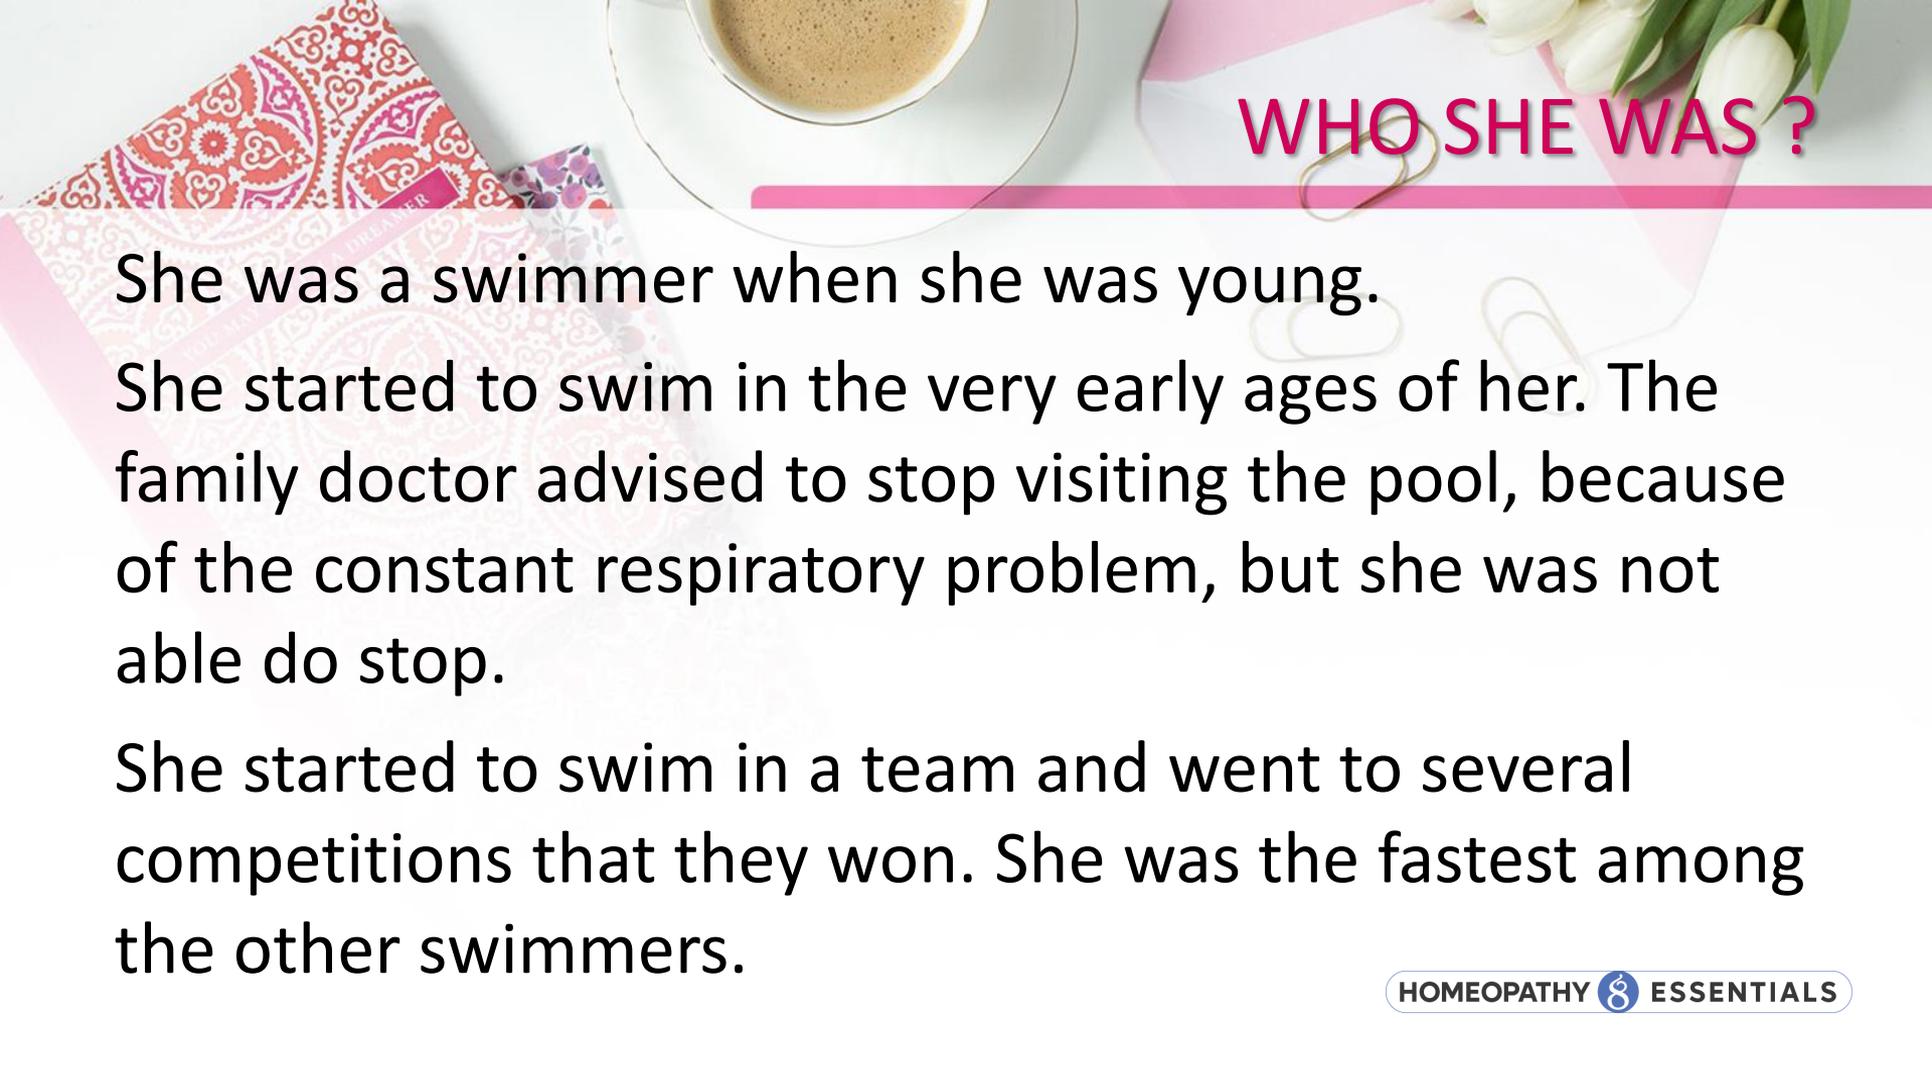

When we are watching together old pics she brilliantly remembers all the person also a second line cousin or a far uncle.

When we are visiting her with my kids, she is speaking to us, but we always have a sensation that she is not in the present with us.

A cup of coffee on a saucer, a pink notebook with a paisley pattern, and a pink ribbon.

My mom gets tired quite soon and then she is not with us, she does not know what we are speaking about.

She smiles to them but never enter again into a conversation.

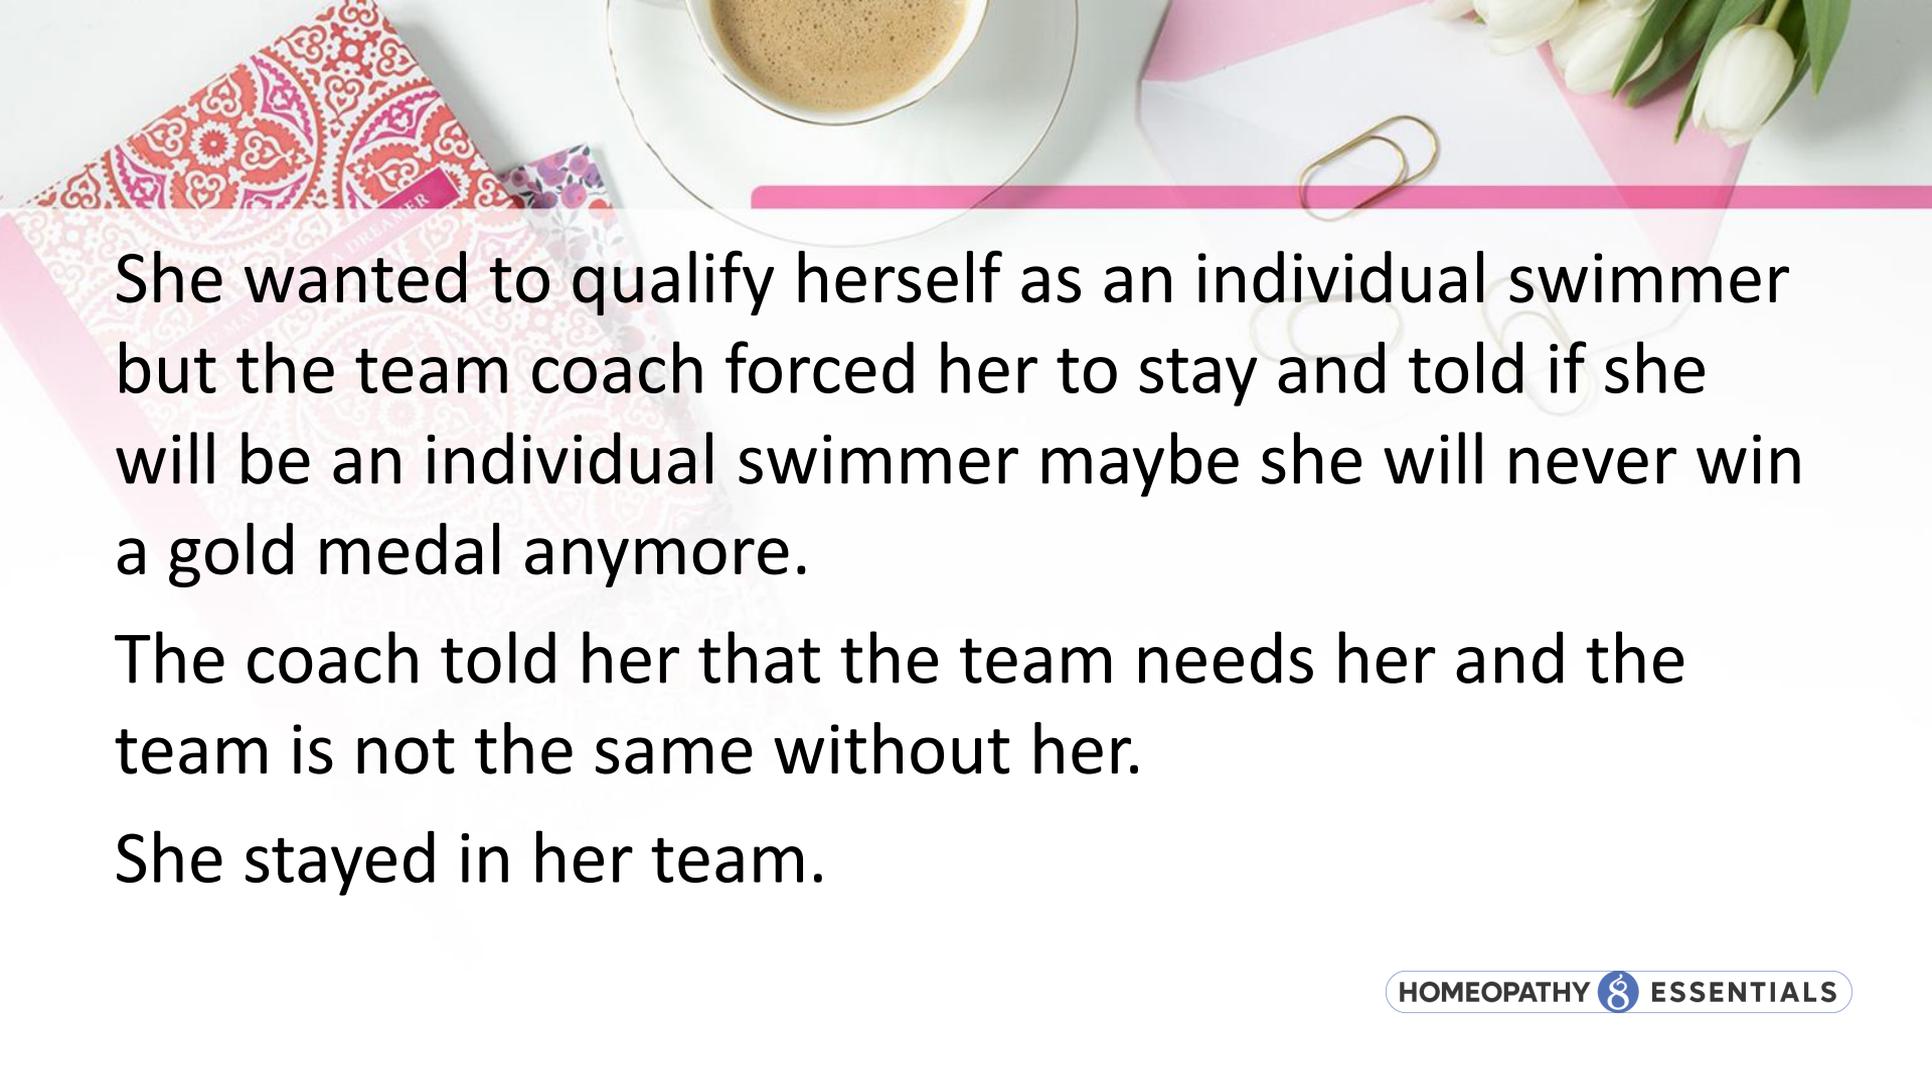

WHO SHE WAS ?

She was a swimmer when she was young.

She started to swim in the very early ages of her. The family doctor advised to stop visiting the pool, because of the constant respiratory problem, but she was not able do stop.

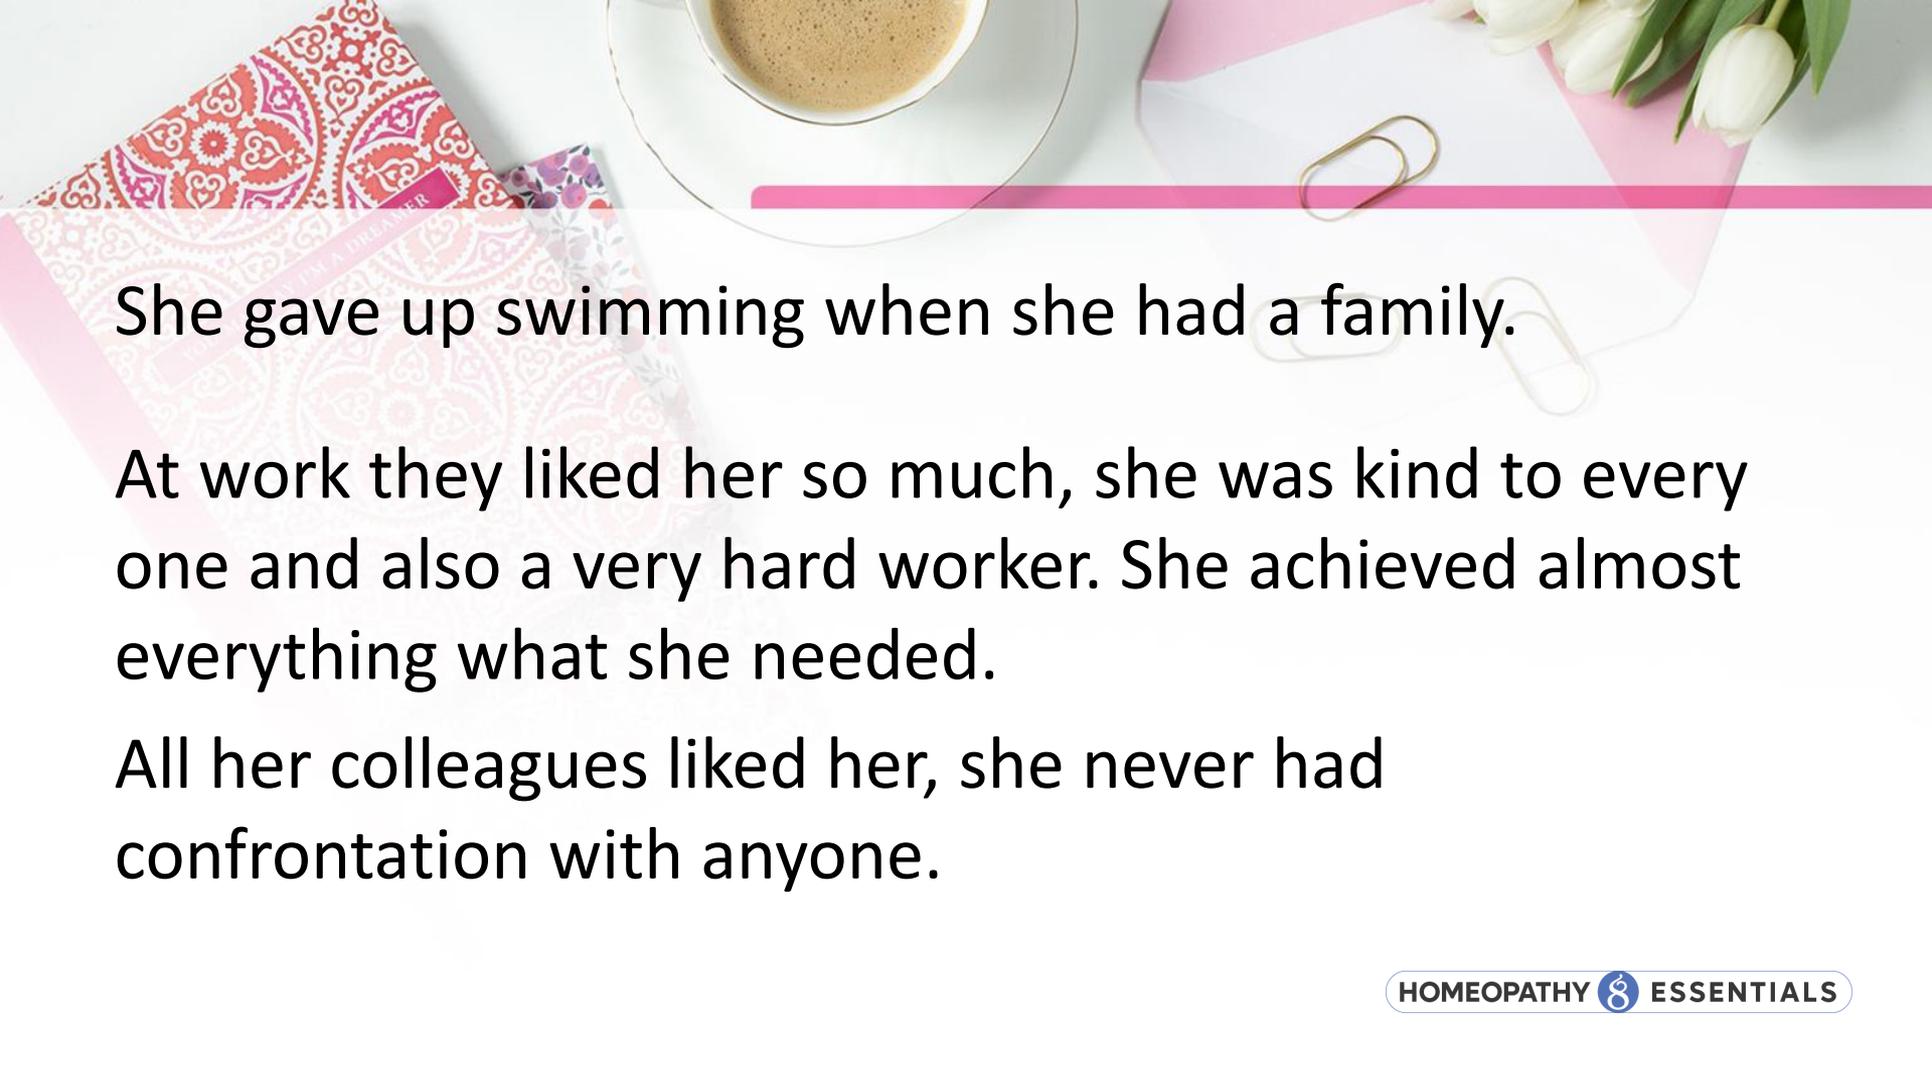

She started to swim in a team and went to several competitions that they won. She was the fastest among the other swimmers.

She wanted to qualify herself as an individual swimmer but the team coach forced her to stay and told if she will be an individual swimmer maybe she will never win a gold medal anymore.

The coach told her that the team needs her and the team is not the same without her.

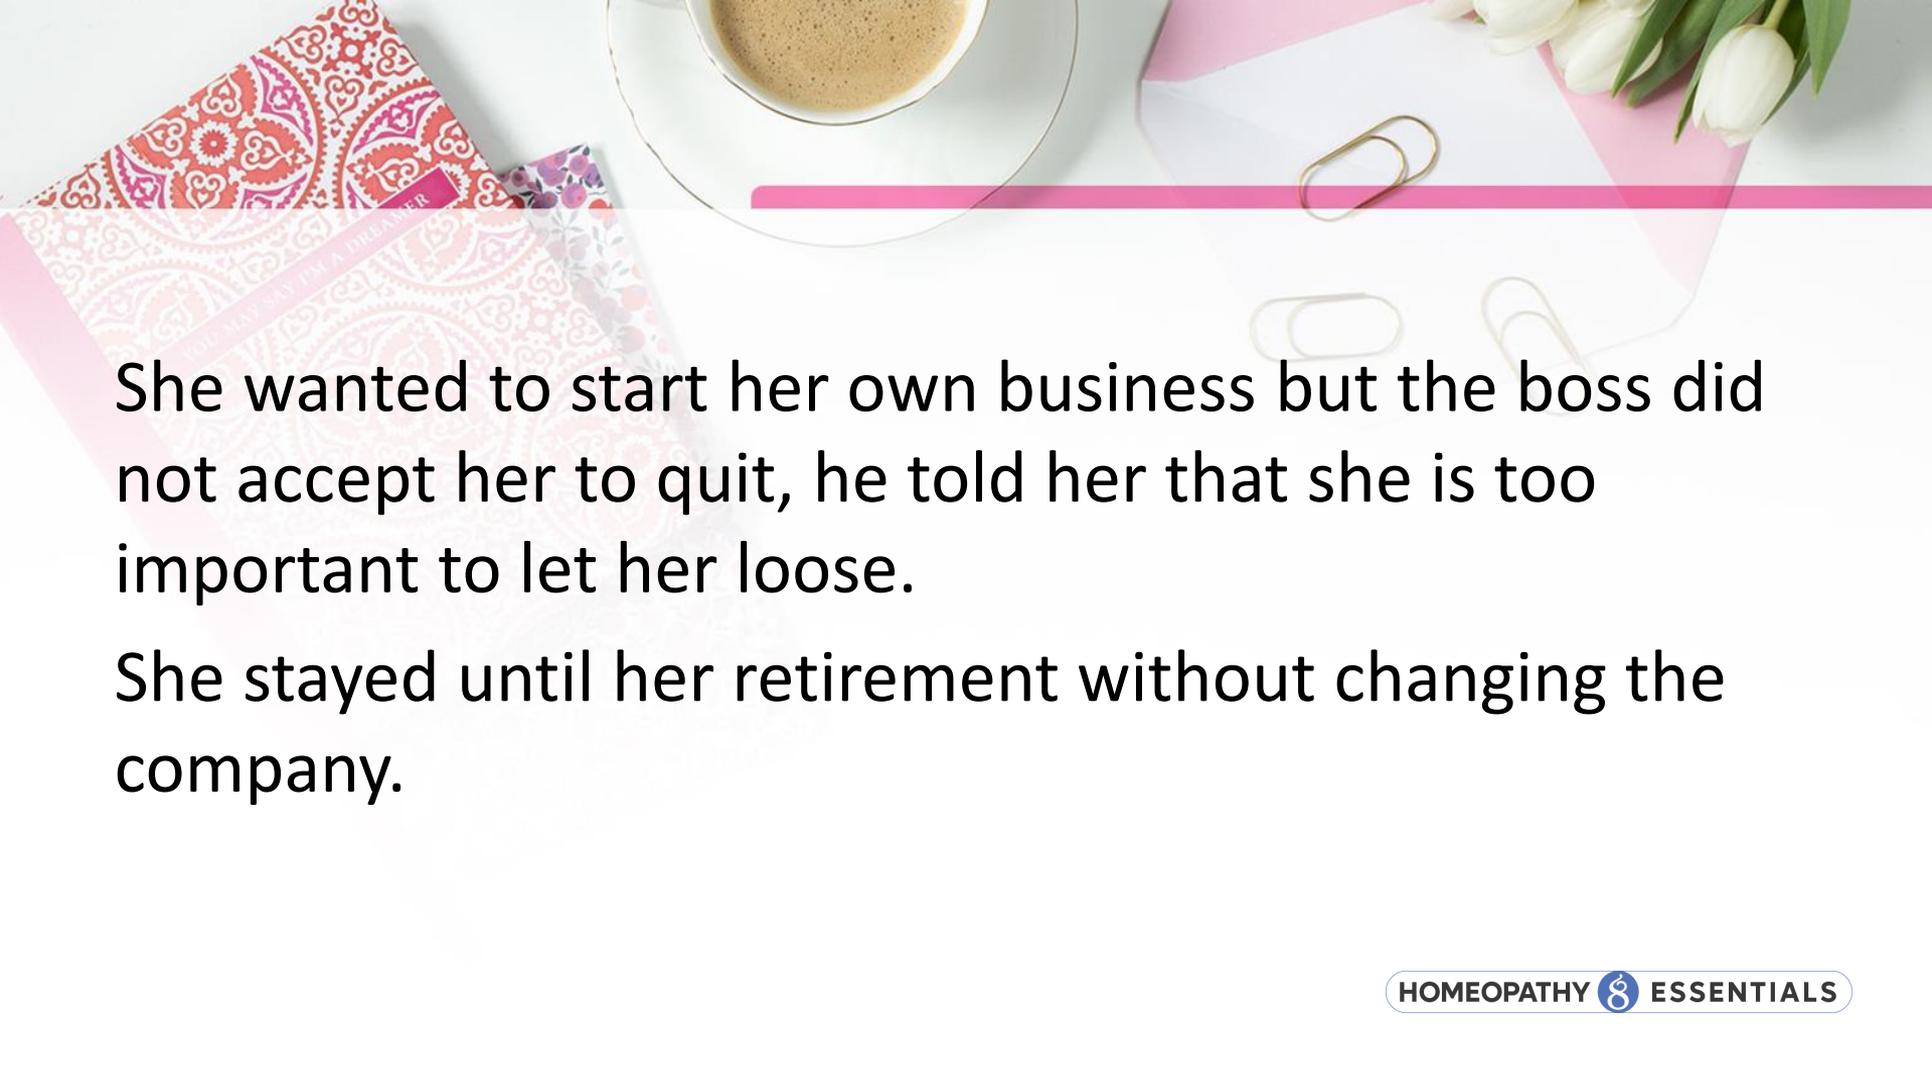

She stayed in her team.

A top-down view of a desk. In the upper center is a white cup of coffee on a saucer. To the left is a notebook with a red and white patterned cover. To the right are two gold paper clips and a pink envelope with white tulips. A thick pink horizontal bar is positioned below the coffee cup.

She gave up swimming when she had a family.

At work they liked her so much, she was kind to every one and also a very hard worker. She achieved almost everything what she needed.

All her colleagues liked her, she never had confrontation with anyone.

A top-down view of a desk with a cup of coffee, a pink envelope, paper clips, and patterned papers. The coffee cup is white with a saucer. The envelope is pink and white. There are three gold paper clips. The papers have red and white patterns. A pink horizontal bar is visible across the middle of the image.

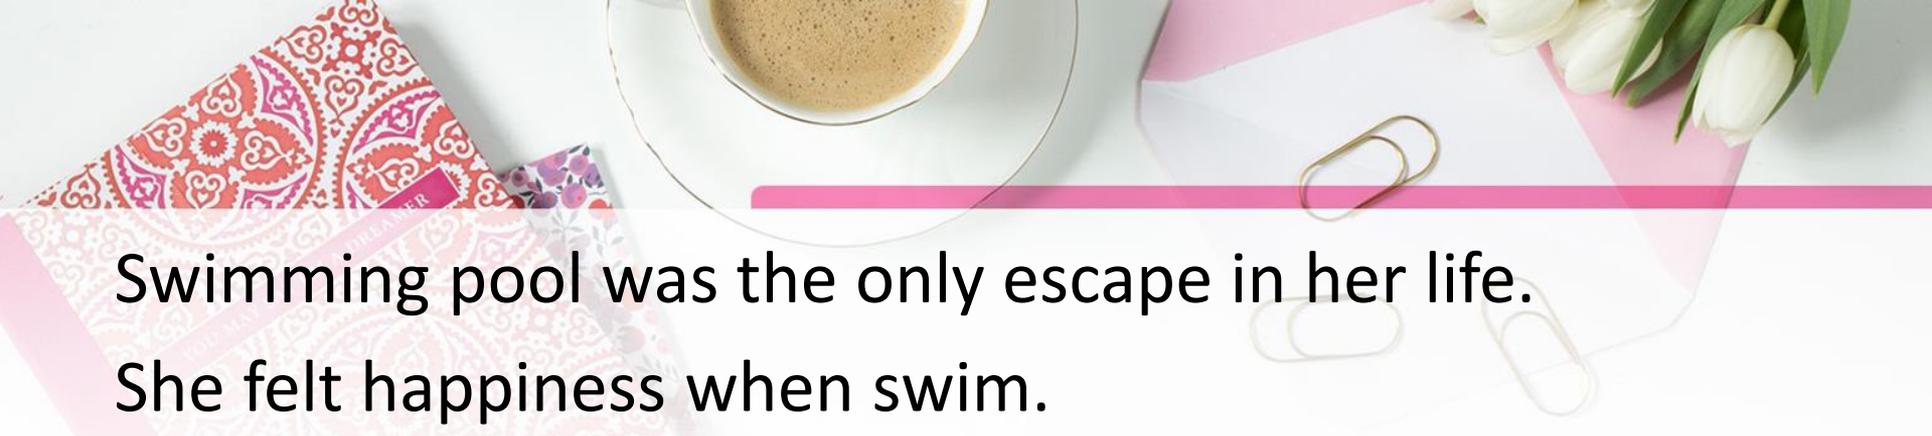

She wanted to start her own business but the boss did not accept her to quit, he told her that she is too important to let her loose.

She stayed until her retirement without changing the company.

Childhood

At school she always had a lot of friends. She never liked the school, she felt bored there.

She wanted to escape and do not go anymore but the schoolmates always insisted to stay with them, play and go to school together.

Swimming pool was the only escape in her life.
She felt happiness when swim.
She was always a skinny, chilly girl, but when she jumped into the cold water she felt warm:

- “as if the water had joined with my body and warmed me up “
- “water was my life “

She did not regret anything in her life, she got a lot of Golden Medals, she has a beautiful family, she had a happy life.

The only one disappointment in her life is that she did not try how is swim alone and establish a company alone.

YOU MAY SAY I'M A DREAMER

FOLLOW UP

A cup of coffee on a saucer, a notebook with a red and white patterned cover, and a pink pen.

6 months after the first visit

The daughter called me, she told she is seeing some improvement.

The mother is taking part of the conversation longer as before when they visit her.

She realized more time being present.

12 months after the first visit

Mother came alone to the office then later the daughter join us.

The daughter told that her mother wanted to come alone to test herself if she knows the way.

The mother is now more conscious about the orientation, remembers the streets and she is able to walk alone to the grocery where she used to go.

18 months after the first visit

The mother is leaving home alone and able to find the way back.

Less foggy moments, more conscious, follows the conversation longer.

Still making mistakes in remembering phone numbers but more or less she started to remember them

A cup of coffee on a saucer, a notebook with a red cover and a patterned cover, and a pink ribbon.

24 months after the first visit

The mother is living a normal life

- finds the way alone
- remembers tel numbers
- follows the conversation

What we see in this case

mental level

- competition (golden medals, own company)
- being in a group or alone?
 - easily gets bored
 - memory problems
 - escape to water

physical level

- dementia
- respiratory complaints
 - chilly
 - thirsty
- desire hot tea

Where is the remedy

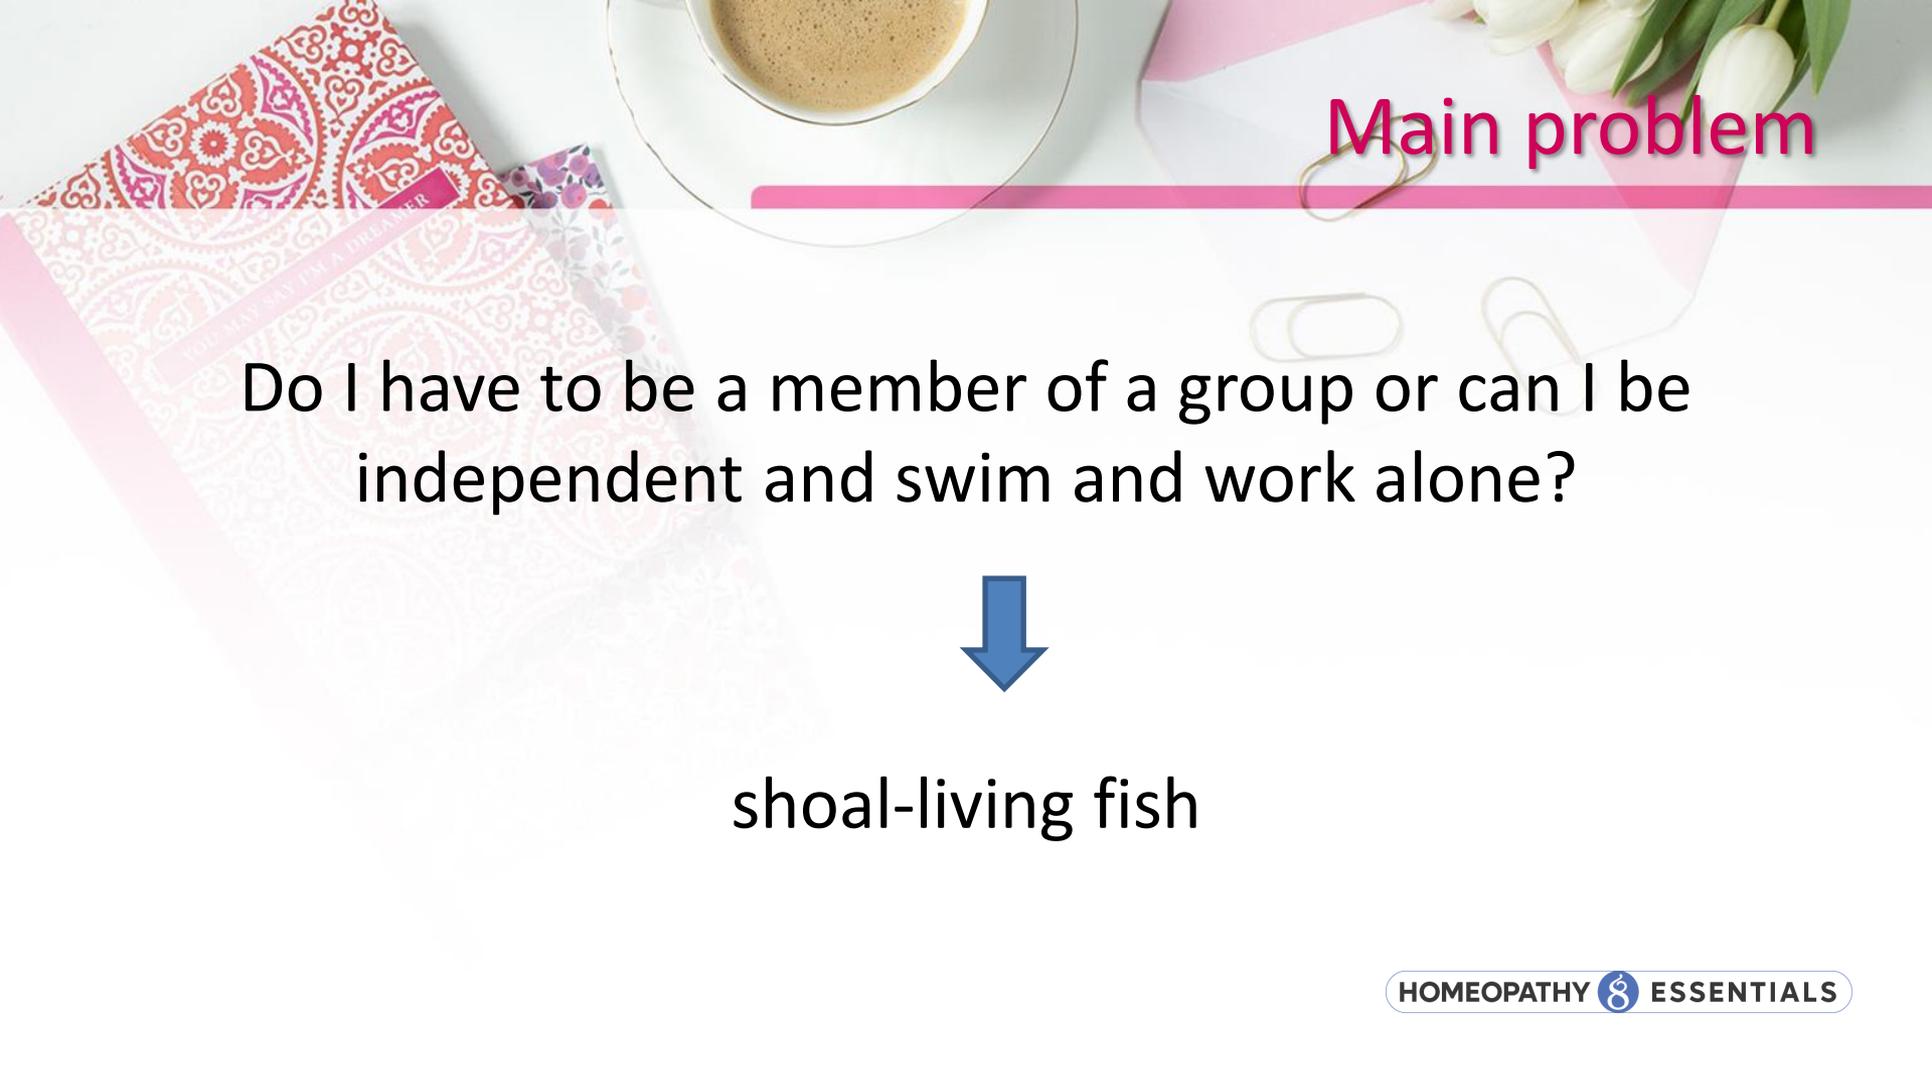

Water environment

Animal kingdom
(vertebrates)

Fish

Main problem

Do I have to be a member of a group or can I be independent and swim and work alone?

shoal-living fish

SHOAL - LIVING FISH

- **Confusion of the mind: Am I capable to do it alone or not ?
Struggle of connecting versus disconnecting**
- **Need protection from the group in a dangerous world**
- **Restless, always ready to do others' demands but with the desire to break free (first phase)**
- **Anxiety what other will tell if he is doing what he wants and showing his own success (first phase)**
- **Hate routine, want to break from conformity and just flow with the wind**
- **Heaviness, indifference, distance, disconnection (second phase)**
- **Female complaints (leukorrhea, fertility)**
- **Skin and respiratory complaints**

SHOAL-LIVING
