

Role of Periodic Table in Homeopathic Prescription -Columns-

9-10th of April 2022, Istanbul

Dr Samir Chaukkar

M.D.(Hom), P.G.Hom(London) H.M.D.(U.K)F.B.I.H.(UK) D.N.D.
P.G.Addictions Treatment(Canada) Dean, Dr Batras Academy Pvt Ltd

UNDERSTANDING OF COLUMNS

There are some important aspects to differentiate the columns:

- 1. How much has the structure developed?**
- 2. How much is the structure capable of carrying out the function of that row?**
- 3. Is the structure losing or has lost its capability? How much has been lost?**

UNDERSTANDING OF COLUMNS

In column 1 there is just the notion of the structure but in reality it is totally absent and there is complete dependence

From column 2 to 9 there is a gradual process of developing the structure

The process reaches its peak at column 10: the structure is complete and there is success

From column 11 onwards, there are efforts to maintain and defend the successful structure against various challenges

From column 12 onwards through column 17, there is a varying degree of degradation .
Collapse of the structure.

In column 18, there are no more issues of the structure so there is a calm and contented state

How to discern the right column?

To come to the remedy's correct column you have to understand not what situation is but what it is perceived to be.

If the patient has power and he is successful in reality but he is constantly living in delusional situation where he has lost the power. All his actions and emotions, sensations and expressions are of somebody who has lost the power. The column will be decided on his perception not on reality.

Similarly a person who has no power but his delusional perception is that he is very powerful. Again his remedy will be chosen on his perception rather than reality.

Column 1 - Kali, Rubidium, Caesium

Understanding:

- *The structure has not started to form;*
- *They are completely dependent on another and will feel that that person/s structure is their own;*

Expressions of the patient: incapability to do things, lack of confidence, cannot do things alone or on their own; always needing somebody next to them, clinging to whatever structure is available, laziness, avoidance, cannot start, slowness, panic, innocence, like a child, loneliness.

1		
1	H Hydrogen 1.008	
3	Li Lithium 6.941	4
11	Na Sodium 22.990	
19	K Potassium 39.098	2
37	Rb Rubidium 84.468	3
55	Cs Caesium 132.905	5
87	Fr Francium 223.029	8

Column 1 - Kali, Rubidium, Caesium

Keywords: *Cant imagine my life without... Dependent like a child... Wont be a able to cope... Lack of confidence... Incapable... Support... I lack*

Kali/ Potassium (Row 4 - Issue of Security, Task, Job)

I exist, I have a separate identity, I have nourishment but I do not have the capacity to protect myself and to be secure. Complete dependency of family, children, etc. for their own security.

Rubidium (Row 5 - Issue of New, Creativity, Performance)

I lack the capability of doing something new, creating and performing.

Caesium (Row 6 - Issue of Responsibility)

I lack the power and the ability to stand on my own and handle responsibilities. Dependency to do things.

1	1	H Hydrogen 1.008	
3	4	Li Lithium 6.941	
11	1	Na Sodium 22.990	
19	2	K Potassium 39.098

55	5	Cs Caesium 132.905	
87	8	Fr Francium 223.029	

4	Be Beryllium 9.012
12	Mg Magnesium 24.305
20	Ca Calcium 40.078
38	Sr Strontium 87.62
56	Ba Barium 137.326
88	Ra Radium 226.025

Column 2 - Calcium, Strontium, Barium

Understanding:

- *Beginning to feel the presence of structure;*
- *It's a provisional structure, like a tent, which serves its purpose only as long as conditions are optimal;*
- *If conditions worsen, then there will be immediately seeking for a more permanent structure;*

“My foundation is so weak, I can barely stand and if there is slightest wind I will fall down”

Expressions of the patient: Lack of confidence, always needing somebody, incapable to do things.

I can do something but I need back up.

Keywords: *support, dependence, encouragement, lack of confidence, incapacity, anchor, protection.*

Column 2 - Calcium, Strontium, Barium

Calcarea (Row 4 - Issue of Security, Task and Job)

They are beginning to find security but at the same time they are still very dependent, if there is slightest danger they will need a support. Their security can be in form of money, physical strength, job, etc. It is like the dependence of the child, they can walk but they still need protection, without protection they are not willing to take up the challenges.

Strontium (Row 5 - Issue of New, Creativity, Performance)

They are beginning to explore new areas and beginning to learn something new, but they feel a lack of capacity to do so and in face of difficulties they need a guide or Guru.

Column 2 - Calcium, Strontium, Barium

Radium
226.025

Barium (Row 6 - Issue of Responsibility)

They are beginning to take up responsibilities for themselves, yet at the same time they are still very much dependent on others.

Facing the slightest problem they feel like a handicapped person.

I have to stand on my own two feet but my legs are cut. I can take responsibility but only with support - spineless.

Column 3 - Scandium, Yttrium, Lanthanum

Understanding:

➤ *They don't know what to do;*

Here they are uncertain regarding the type of structure. The structure is starting to form but it doesn't not have specific shape. Lack of confidence and they are uncertain of what they want.

Confusion in form of security, performance or leadership even if back up is there.

Keywords: *doubt, hesitation, unsure, molding, conviction, will-power, shape, confusion.*

21

39
Y
Yttrium
88.906
57-71
Lanthanides
89-103
Actinides

Column 4 - Titanium, Zirconium, Hafnium

Understanding:

- They know what to do but they are not able to start;
- They find it difficult to start because they doubt their capacity; self doubt;

Here there is a progression from column 3 where confusion and doubt prevail. **First Clear Structure and Foundation. No Confusion.** Now they are sure of the structure but the doubt about having a structure is thoroughly resolved. There is feeling of inadequacy. *“Will I be able to do it? I have a foundation. I am sure about the type of the structure but uncertain about steadiness. It may look complete but is it steady enough? Will it sustain?”*

Keywords: commencing, beginning, starting off, taking off, incapacity, inadequate, lack of confidence.

22	Ti Titanium 47.867
40	Zr Zirconium 91.224
72	Hf Hafnium 178.49
104	Rf Rutherfordium (261)

Column 4 - Titanium, Zirconium, Hafnium

Titanium (Row 4 - Issue of Security, Task, Job)

They start to protect themselves but are unsure of their ability.

Zirconium (Row 5 - Issue of Creativity, Performance)

They start to go into something new or to create something but are unsure of their ability.

Hafnium (Row 6 - Issue of Responsibility)

They start to be independent and take up responsibility but are unsure of their ability.

[261]

Column 5 - Vanadium, Niobium, Tantalum

Understanding:

- *They know what to do;*
- *They start moving forward but then come back because they only have enough confidence to start but not to continue;*

Though the structure is complete the foundations are not strong enough for them to venture further. They feel they are not **prepared** enough and need to work more, thus they postpone going ahead. They take a **one foot forward and one foot backward approach**.

“ I want to do more” alternates with “ I cannot do more”

Should I do it now or should I postpone?

Can I do it or not? Ambiguity about ability not about choice. Concerned about success.

105

DbDubnium
[262]

Column 6 - Chromium, Molybdenum, Tungsten

Understanding:

- *They have to do it, there is no turning back;*
- *They have confidence and capacity not to come back;*

The feeling is that the structure is complete and there is no coming back. But now they need to prove themselves in difficult and challenging situations. Here there is a question:

How much I can bear? The structure is being constantly tested.

Risk, challenges. If I take risk then I will be successful. I want to take risk, I will work hard, put in lot of efforts.

[266]

Column 7 - Manganum, Technetium, Rhenium

Understanding:

- *The structure is adequate in normal conditions but it needs support in tough conditions;*
- *One does have the capacity but doubts about the adequacy of the structure in difficult conditions;*
- *One doesn't need to prove oneself anymore;*
- *There is a need to refine improve reinforce, bolster and fine tune;*
- *Lot of improving. I will read lot of books - improvement, team work, I can extract work from people - improvement and team*

Here there is a definite, formed and complete structure, which is tested and is capable of fulfilling its functions and can stand independency. But it still does not function to 100% of its capacity. The feeling is: *"Is my structure adequate in difficult situations?"* or *"How much more can I do?"*

[269]

Column 8 - Ferrum, Ruthenium, Osmium

- The elements of column 8 are the toughest in the periodic table and they have some of the highest densities in their rows.
- At this stage the structure is complete, proven and tested. It can stand by itself and resist any opposition. They are faced with lot of opposition and pressure from outside so they need to persevere and resist the force or antagonism. They need to exert their force against the pressure. They are very hard and persistent. They cannot be bent or moulded.

[269]

Column 8 - Ferrum, Ruthenium, Osmium

Row 4 - Issue of Security, Task, Work

I must protect and defend. I have to resist the pressure and opposition. They feel complete to do something against their wish and have to fight against it.

Ferrum (Iron) lies in the 4th period of the Periodic Table along with the metals Manganese, Cobalt, Nickel, Copper and Zinc. This line of metals is concerned with performance, and also with defence.

Iron is used in gates, fences, helmets, battle tanks, shields of armour. All these objects are used to protect, to prevent things from the outside from intruding into one's territory.

Ferrum patients have to protect and defend both themselves and their families. And so, they perform by defending. It is as though they are always at war, fighting to defend themselves and their families.

[269]

Column 9 - Cobalt, Rhodium, Iridium

Understanding:

- *There is no longer resistance or opposition from outside;*
- *The structure is near perfect but just a little short of perfect;*
- *Near perfection, structure near complete and one mistake can stop your success;*
- *I am near success but what if I make a mistake? - lot of self doubt;*

In column 9 the structure is capable of facing opposition but it should be absolute and complete.

The main issue now is of completing one's structure and making it perfect in terms of either protection, performance or handling responsibility.

If its not perfect and there is failure it leads to great humiliation.

MtMeitnerium
(268)

- They have success in sight and are very close to perfection and need to work on finer details just giving last minute finishing touches. This fear of failure and the anticipatory anxiety is similar to that one experiences before a big performance or before some big task.
- For these remedies it is the stage of refining and perfecting the structure without support . There is no longer a need to be tough or hard. It is the final step.

Column 9 - Cobalt, Rhodium, Iridium

Keywords

- Absolute
- Am I really good?
- Complete
- Failed miserably
- Failure and success
- Final presentation
- Finer details
- Finishing touches
- It should be perfect
- Quality work
- Self doubt
- Self humiliation
- Self mortification
- Sense of perfection
- Success in sight
- What if I don't succeed?

(Ds)

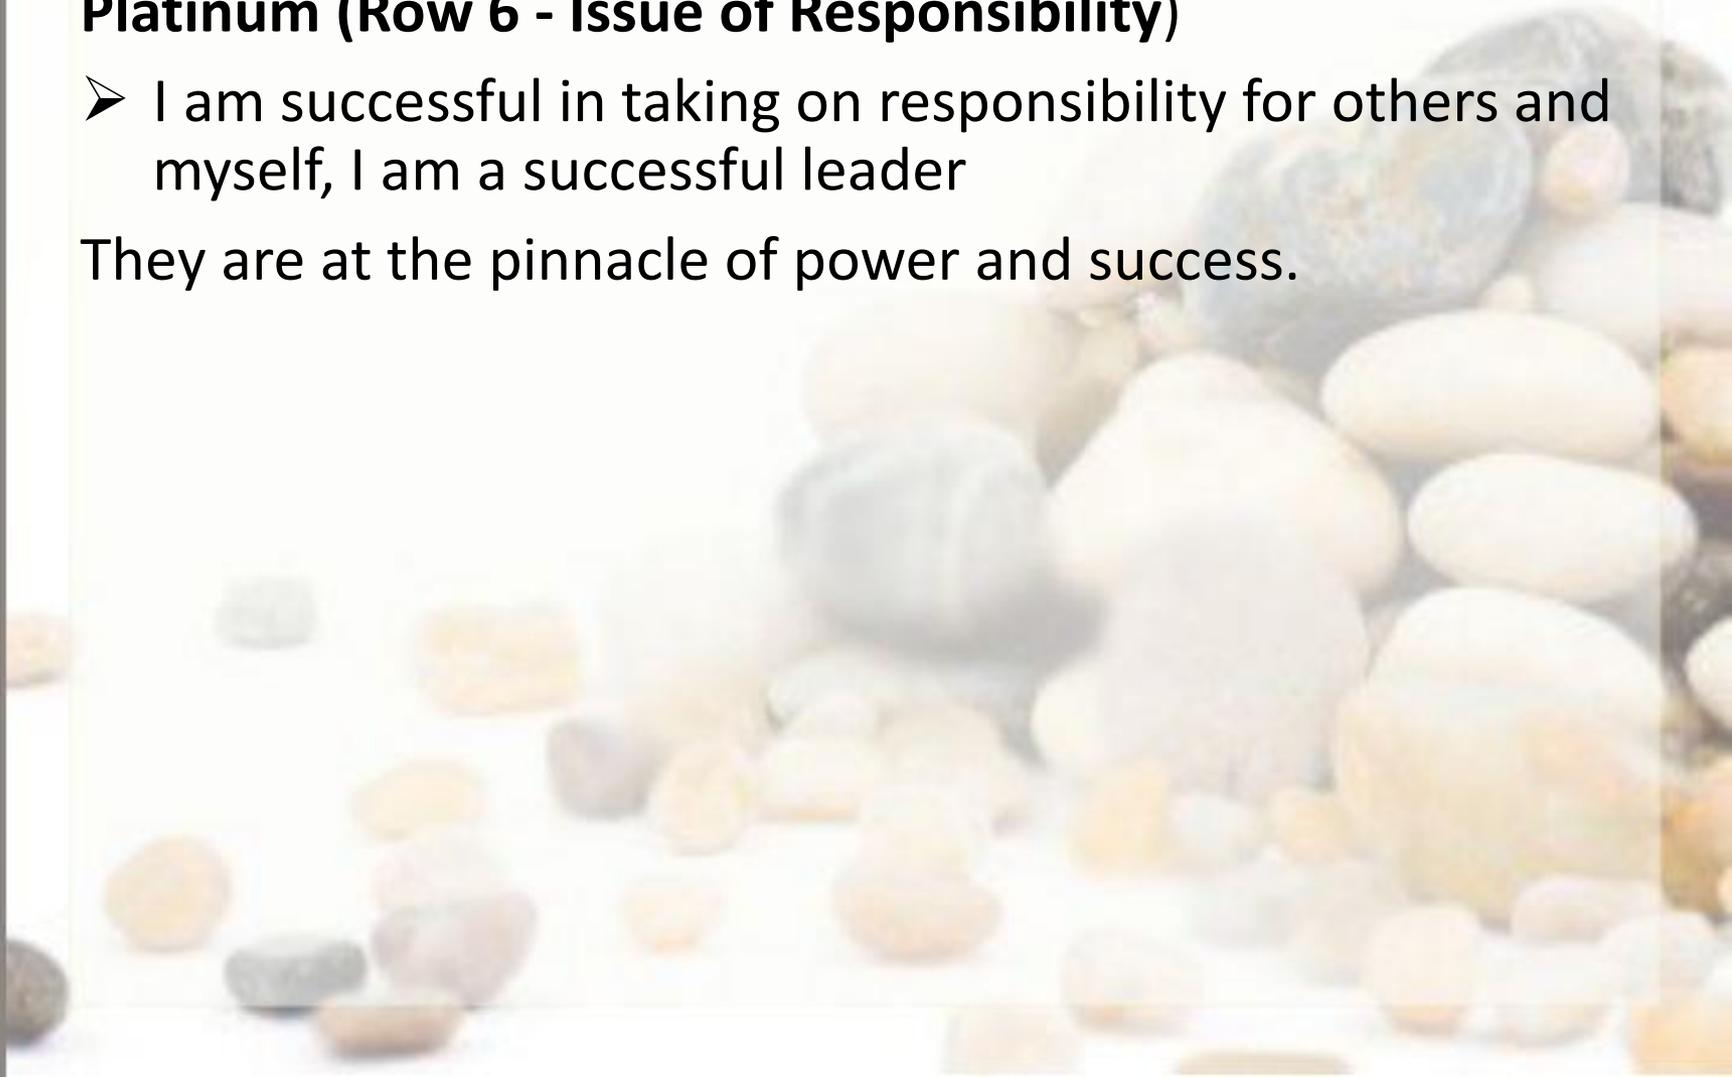

Column 10 - Niccolum, Palladium, Platinum

Platinum (Row 6 - Issue of Responsibility)

- I am successful in taking on responsibility for others and myself, I am a successful leader

They are at the pinnacle of power and success.

28	Ni Nicol 58.693
46	Pd Palladium 106.42
78	Pt Platinum 195.085
110	Ds Darmstadtium (294)

Column 11 - Cuprum, Argentum, Aurum

Understanding:

- *The structure stands by itself;*
- *Will it **maintain** itself in adverse circumstances?;*
- ***Necessity of maintaining** his or her successful position, holding onto it and defending it against any attacks - time to time;*

They need to maintain their position of success and they put in a constant effort to maintain that position with a very high degree of performance (much higher than column 10).

They fear that at any time they could lose their successful position so they are in a constant stage of high stress and tension (not the ease as in column 10). Out of this fear the caliber of their performance becomes even higher. They also have the need to reach an even higher level of success.

29	Cu Copper 63.546

- Keep up
- Defend
- Attack
- Preserve
- Ordeal
- Critical
- Performace
- Responsibility
- Striking

29	Cu Copper 63.546
47	Ag Silver 107.868
79	Au Gold 196.967
111	Rg Roentgenium (272)

Column 11 - Cuprum, Argentum, Aurum

Cuprum – Copper (Row 4 - Issue of Security, Task, Work)

- They have reached a level of success as far as security is concerned, both financially as well as feeling protected. In order to maintain their position they have to keep up their defenses. They are tested by intermittent attacks to their structure so they are always ready for attack and to defend.

Keywords of *Cuprum*: striking, defend, attack.

29	Cu Copper 63.546
47	Ag Silver 107.868
79	Au Gold 196.967
111	Rg Roentgenium (272)

Column 11 - Cuprum, Argentum, Aurum

Argentum – Silver (Row 5 - Issue of facing the New, Creativity, Performance)

They are successful in performance but their performance is tested. And in order to be appreciated and maintain the position they must keep up to their standard in every creative venture or performance. The feeling is *“am I good enough? I will be appreciated if only I can perform”*. They believe that one bad performance can bring them down from their successful position.

[272]

Column 11 - Cuprum, Argentum, Aurum

Aurum - Gold (Row 6 - Issue of Responsibility)

They have reached the top position. And they have to maintain this position by handling responsibilities in every circumstance. Every crisis is the test of their ability to keep control to take charge and to keep their position, whether they are capable of running an organisation or whether they can stand on their own. The feeling is “are you good enough?”

29	Cu Copper 63.546
47	Ag Silver 107.868
79	Au Gold 196.967
111	Rg Roentgenium [272]

Column 11 - Cuprum, Argentum, Aurum

The feeling is of a leader who takes even more responsibility than necessary.

The situation is like of a prime minister of a country who has already been chosen as a leader and has reached the top position but needs to maintain this position by constantly maintaining a certain standard.

So they will handle all responsibilities personally so as not to risk losing confidence of others and himself.

29	Cu Copper 63.546
47	Ag Silver 107.868
79	Au Gold 196.967
111	Rg Roentgenium {272}

Column 11 - Cuprum, Argentum, Aurum

Like Argentum has the feeling I am a great performer/singer but if I make a mistake I will lose my position. So I have to be always alert not to lose it.

The same story with Aurum who says I have a good reputation as a leader but they must not lose their confidence in me. In parliamentary democracy when the prime minister does something wrong then they pass a vote of no confidence against him. That is the most scary thing for a prime minister that people will lose their trust in him, that he will lose his position.

Column 12 - Zincum, Cadmium, Mercury

Understanding of Column 12:

- *There is a constant attack on the structure;*
- *Accordingly, there is a constant fight to prevent it from damage;*
- *Constant vigilance and constant alertness;*
- *Restlessness;*
- *Betrayal;*
- *They start to have enemies now;*

(277)

Column 12 - Zincum, Cadmium, Mercury

There is beginning of fear, the fear that the structure is getting damaged, getting finished and going down.

They feel a constant threat to their structure (in Cuprum the attack is intermittent) and threats of being destroyed. Cheated, robbed and plotted against.

They start to have enemies now. So they are on constant watch, constant look out, constant vigilance and have a constant alertness.

This makes them very restless, hurried and impatient. They fight constantly but not always successfully (unsuccessful efforts).

Column 13 - Gallium, Indium, Thallium

Understanding of Column 13:

- *The structure is under severe attack, structure redundant - feels as if he is old and obsolete, Im sole earner of the family, Im becoming useless, speak about olden days, nostalgia;*
- *The loss is imminent. It is not a question whether it will happen but when it is going to happen;*
- ***Superhuman efforts*** are needed to maintain it;
- *Delaying the disaster not whether but when?;*
- *Holding on;*
- *But how long can you hold on?;*
- *Fear of failure;*

49	In Indium 114.818
81	Tl Thallium 204.383
113	Uut Ununtrium unknown

Column 13 - Gallium, Indium, Thallium

The feeling is like a juggler who must be constantly alert, where constant coordination, control and monitoring are necessary. Other examples are holding the fort under severe attack or the captain of a sinking ship.

These people have to make intense efforts so that the thing in question does not slip away. He needs superhuman efforts to control matters and is always on the edge.

There is fear of some imminent, drastic, impending disaster or doom. There is a sinking feeling as if their position is about to slip away the same feeling when you know tsunami tidal waves are heading towards you. There is a fear of losing what he has and fear of failure.

- Going down
- Sinking
- Losing hold
- Losing control
- Vigilance
- Monitoring
- Prevention

Column 13 - Gallium, Indium, Thallium

Gallium (Row 4 - Issue of Security, Task, Work)

There is an imminent loss of protection and security just like the robber has attacked and the loss is imminent.

In Cuprum the feeling is that the robber attacks intermittently and in Zincum there is a constant attack by the robber.

Indium (Row 5 - Issue of facing the New, Creativity, Performance)

My failure as a creative person is imminent. My next efforts/performance could be a complete failure. I have to be very vigilant to prevent or postpone this.

Rubrics - Dreams animals, bulls chased by; Dreams of foreign country; Dreams of fruitless efforts of escaping from danger; Dreams of lost in forest; Dreams of lost in mountains.

5	B Boron 10.811
13	Al Aluminum 26.982

Column 14 - Germanium, Stannum, Plumbum

Understanding: marked profound weakness - Cancer (Thief) has already entered in body but with chemo, radio can I save myself, my organs, how much more can you prevent - sense of forsaken, abandoned - How much more can I save?

- *The structure has failed;*
- *The loss has happened;*
- *It could not be prevented;*
- *Can it be restored?*
- *Desperate efforts to replace the loss (of security, creativity or power/control)*

I'm a captain of the ship which has already sunk, whatever had to happen has already happened.

The feeling is: *"I have already lost"* now the question is *"Can I recover it or not?"*

Example: *The thief has already come into the house. "Can I chase him out or not?"*

Column 15 - Arsenic, Antimony, Bismuth

Understanding:

- *Want to depend but no one there;*
- *The structure is being eroded, breaking, but little function possible;*
- *It is falling apart and its integrity cannot be preserved;*
- *Have to be careful and see how much and how long can it be preserved;*

The feeling is *"I'm losing and it I'm too weak to preserve it"*

They can't depend on others for that and feel absolutely alone to face it. There is no hope of recovery. The question is *"How much can I save? It is going from me, I'm losing, and how much can I still keep?"*
